Studying The World And The United Nations System:

United Nations United States. Department of State. Office of Media Services,1970 *Transforming the United Nations System* Joseph E. Schwartzberg,2016-09-02 Global problems require global solutions The United Nations as presently constituted however is incapable of addressing many global problems effectively One nation one vote decisionmaking in most UN agencies fails to reflect the distribution of power in the world at large while the allocation of power in the Security Council is both unfair and anachronistic Hence nations are reluctant to endow the United Nations with the authority and the resources it needs Extensive reform is essential This analysis is rooted in the proposition that the design of decisionmaking systems greatly affects their legitimacy and effectiveness Joseph Schwartzberg proposes numerous systemic improvements to the UN system largely through weighted voting formulas that balance the needs of shareholders and stakeholders in diverse agencies It indicates ways in which the interests of regions can supplement those of nations while voices of nongovernmental organizations and ordinary citizens can also be heard In numerous contexts it promotes meritocracy and gender equity The book s aim is not to create an unrealistic utopia but rather to establish a workable world in which the force of law supplants the law of force a world committed to justice and continuous yet sustainable development The author argues that given the many existential threats now confronting our planet the time frame for decisive action is short The task is daunting and success is not guaranteed but in view of the urgency of our situation we can find ways of mustering the will imagination and resources to do the job **International Organization and Conference Series** ,1959 Resources in Education ,1990-10 *International Organization and Conference Series* United States. International Studies Scott Straus,Barry Driscoll,2018-09-10 The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems In International Studies Global Forces Interactions and Tensions award winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors forces interactions and tensions contribute to world events with both global and local consequences The authors first show students how to look for common patterns in global issues by introducing four world shaping forces global markets shifting centers of power information and communications technologies and global governance

They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves: Who is interacting? Where did such interactions develop? What policies or institutions govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics, and global health responses, climate change, food security, and more. International Studies raises the bar for the Introduction to IS course, moving beyond interdisciplinary and into the realm of critical analysis to increase student relevancy and motivation.
