**Towards a Theory of Epistemically Significant Perception** Nadja El Kassar, 2015-09-25 How does perceptual experience make us knowledgeable about the world In this book Nadja El Kassar argues that an informed answer requires a novel theory of perception perceptual experience involves conceptual capacities and consists in a relation between a perceiver and the world Contemporary theories of perception disagree about the role of content and conceptual capacities in perceptual experience In her analysis El Kassar scrutinizes the arguments of conceptualist and relationist theories thereby exposing their limitations for explaining the epistemic role of perceptual experience Against this background she develops her novel theory of epistemically significant perception Her theory improves on current accounts by encompassing both the epistemic role of perceptual experiences and its perceptual character Central claims of her theory receive additional support from work in vision science making this book an original contribution to the philosophy of perception

*Pockets of*

*Change* Jane Stadler, Peta Mitchell, Adam Atkinson, Tricia Hopton, 2011-04-29 The twelve essays collected in *Pockets of Change* locate adaptation within a framework of two overlapping if not simultaneous creative processes on the one hand adaptation is to be understood as an acknowledged transposition of an existing source that is the process of adapting from on the other hand adaption is also a process of purposeful shifting and evolving of creative practices in response to external factors including but not limited to other creative works in other words the process of adapting to This book explores adaptation then as an active practice of repetition and as a reactive process of development or evolution The essays also extend beyond the production transformation and interpretation of texts to interrogate the values and practices at work in cultural transition and transformation during periods of social and historical change Collectively the papers theorize adaptation by taking on three tasks first to examine the conditions under which the two processes of adaptation operate second to give an account of the space and moment in which the processes unfold the pockets of the title and finally to examine what emerges from pockets of adaptation While adapting from and adapting to are both processes that appear to preclude innovation in the way that they acknowledge and depend on external sources *Pockets of Change* demonstrates that adaptation is productive It not only references prior texts attitudes practices and media but it also invites us to re visit the past and to re think the present in new ways potentially giving narrative space to muted or occluded voices This book therefore brings together an innovative and varied range of approaches to interpretations and uses of adaptation challenging the assumption that an adaptation is simply either a re make or the act of turning one medium into another Adaptation then names not only the means by which texts are transformed but also the space in which that transformation takes place T
