ring Along the way he reveals the inner workings of the multimillion dollar maple sugar industry Make no mistake it s big business complete with a Maple Hall of Fame a black market a major syrup heist monitored by Homeland Security a Canadian organization called The Federation and a Global Strategic Reserve that s comparable to OPEC fitting since a barrel of maple syrup is worth more than a barrel of oil Whynott brings us to sugarhouses where we learn the myriad subtle flavors of syrup and how it s assigned a grade He examines the unusual biology of the maple tree that makes syrup possible and explores the maples and the industry s chances for survival highlighting a hot button issue how global warming is threatening our food supply Experts predict that by the end of this century maple syrup production in the United States may suffer a drastic decline As buckets and wooden spouts give way to vacuum pumps and tubing we see that even the best technology can t overcome warm nights in the middle of a season and that only determined men like Bascom can continue to make a sweet life out of rugged land DIV **Annual Report of the Agricultural Experiment Stations of the Louisiana State University and A. & M.
