Pabst Battin, 1995 This book provides a broad systematic and comprehensive exploration of both historical and contemporary argumentation concerning suicide It probes the underlying ethical religious and philosophical issues about self caused death and shows how they are crucial in the current debate Suicide Michael Cholbi, 2011-08-26 Suicide was selected as a Choice Outstanding Academic Title for 2012 Suicide The Philosophical Dimensions is a provocative and comprehensive investigation of the main philosophical issues surrounding suicide Readers will encounter seminal arguments concerning the nature of suicide and its moral permissibility the duty to die the rationality of suicide and the ethics of suicide intervention Intended both for students and for seasoned scholars this book sheds much needed philosophical light on one of the most puzzling and enigmatic human behaviors **Suicide, the Philosophical Issues** M. Pabst Battin, David J. Mayo, 1980-01-01 **Comprehensive Textbook of Suicidology** Alan Lee Berman, Morton M. Silverman, Bruce Michael Bongar, 2000-08-10 Multidisciplinary and comprehensive in scope this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention providing a foundation in theory research and clinical applications Issues relevant to clinical case management are highlighted and various treatment modalities are discussed in light of the latest research findings **The Death Debate** Margaret Pabst Battin, M. Pabst Battin, 1996 The Death Debate focuses on the central philosophical question What role may the individual play in his or her own death Battin considers the arguments for and against suicide throughout history while offering a culturally diverse perspective She takes both a short range and a long range view of the issues including a chapter length treatment of physician assisted suicide *The Ethics of Suicide* Victor Cosculluela, 2020-07-20 Originally published in 1995 this volume addresses a topical subject assisted suicide The book discusses the issues surrounding the morality of suicide and in so doing clarifies the literature in applied ethics It critiques the complex moral and religious arguments on the topic offered by philosophers and theologians It establishes a middle position between those who hold that suicide is never morally permissible and those who claim it always is and it determines when second parties ought to aid and when they ought to prevent suicides Exploring the Philosophy of Death and Dying Travis Timmerman, Michael Cholbi, 2020-12-30 Exploring the Philosophy of Death and Dying Classical and Contemporary Perspectives is the first book to offer students the full breadth of philosophical issues that are raised by the end of life Included are many of the essential voices that have contributed to the philosophy of death and dying throughout history and in contemporary research The 38 chapters in its nine sections contain classic texts by authors such as Epicurus Hume Nietzsche and Schopenhauer and new short argumentative essays specially commissioned for this volume by world leading contemporary experts Exploring the Philosophy of Death and Dying introduces students to both theoretical issues whether we can survive death whether death is truly bad for us whether immortality would be desirable etc and urgent practical issues the ethics of suicide the value of grief the appropriate medical criteria for declaring death etc raised by

human mortality enabling instructors to adapt it to a wide array of institutions and student audiences As a pedagogical benefit PowerPoints discussion questions and test questions for each chapter are included as online ancillary materials

Breaking the Thread of Life Robert Barry, 2017-07-28 Suicide and how civilized people should respond to it is an increasingly controversial topic in modern society In Holland suicide is the third leading cause of death of people between the ages of fifteen and forty In the United States it is the second leading cause of death among older teenagers Laws prohibiting assisted suicide are being directly and boldly confronted by activists in the United States most notably Jack Kevorkian Meanwhile the American Civil Liberties Union has publicly declared suicide a fundamental human right that should be protected under the Constitution The Hemlock Society has introduced referenda in California Washington and Oregon to legalize suicide and assisted suicide The most vocal opposition to these initiatives has come from the Roman Catholic church Breaking the Thread of Life marshalls philosophical moral medical historical and theological arguments in support of the Roman Catholic position against suicide In a comprehensive study of the history of suicide Barry shows that Christian civilization was one of only a few early societies that was able to bring suicide under control He counters claims that Catholicism and the Bible endorse rational suicide Barry also analyzes arguments in support of the rationality of suicide and illuminates their biases inadequacies and dangers Barry presents the rationale for the Roman Catholic church's strong extensive and articulate opposition to efforts to gain legal and social endorsement of suicide and assisted suicide His book represents the most complete study of the classical Roman Catholic view of rational suicide to date and it will be of significant interest to philosophers theologians physicians and lawyers *Contemporary Perspectives on Rational Suicide* James L. Werth, 2013-06-17 This text brings together spokespersons from several different disciplines who can present their arguments for or against rational suicide as a viable concept and consequently a realistic option The pros and cons of the discussion format bring the readers to search for their beliefs and the final decision of acceptance or rejection of the concept is left to each individual reader **Rational Suicide?** James L. Werth Jr., 2016-02-04 The idea that suicide may be an acceptable rational option is rarely presented in professional literature However recent events and developments forcefully demonstrate that mental health professionals can no longer ignore the possibility that people can make a rational decision to die After introducing the concept of rational suicide the book explores the changing views of suicide over the centuries Common arguments against rational suicide are examined and rebutted *The Foundations of Bioethics* H. Tristram Engelhardt, 1996 This new thoroughly recast Second Edition has been acclaimed as the most important book written since the beginning of that strange project called bioethics Stanley Hauerwas Duke University Its philosophical exploration of the foundations of secular bioethics has been substantially expanded The book challenges the values of much of contemporary bioethics and health care policy by confronting their failure to secure the moral norms they seek to apply The nature of health and disease the definition of death the morality of abortion infanticide euthanasia physician assisted suicide germline

genetic engineering triage decisions and distributive justice in health care are all addressed within an integrated reconsideration of bioethics as a whole New material has been added regarding social justice health care reform and environmental ethics The very possibility and meaning of a secular bioethics are re explored **Assisted Suicide: The Liberal, Humanist Case Against Legalization** K. Yuill, 2013-03-05 This book presents an atheistic case against the legalization of assisted suicide Critical of both sides of the argument it questions the assumptions behind the discussion Yuill shows that our attitudes towards suicide not euthanasia are most important to our attitudes towards assisted suicide The Father's Will Nicholas E. Lombardo, 2013-12 Drawing on philosophical analysis and historical critical exegesis this study sets out to clarify the Father's will for Christ and how it relates to his death on the cross Then after considering the theologies of Anselm and Peter Abelard it argues for the recovery of the early Christian category of ransom **Philosophy of Law** John Finnis, 2011-04-07 This volume of John Finnis's collected essays shows the full range and power of his contributions to the philosophy of law The volume collects over 20 papers on the foundations of law's authority major theories and theorists of law legal reasoning revolutions rights and law and much more Private Fleming at Chancellorsville Perry Lentz, 2006 What intelligent person has never pondered the meaning of life For Yuval Lurie this is more than a puzzling philosophical question it is a journey and in this book he takes readers on a search that ranges from ancient quests for the purpose of life to the ruminations of postmodern thinkers on meaning He shows that the question about the meaning of life expresses philosophical puzzlement regarding life in general as well as personal concern about one's own life in particular Lurie traces the emergence of this question as a modern philosophical quandary riddled with shifts and turns that have arisen over the years in response to it Tracking the Meaning of Life is written as a critical philosophical investigation stretching over several traditions such as analytic philosophy phenomenology and existentialism It maps out a journey that explores pivotal responses to this question drawing especially on the thought of Tolstoy Wittgenstein Sartre and Camus and exploring in depth the insights these thinkers offer regarding their own difficulties concerning the meaning of life In the book's four sections Lurie discusses Tolstoy's challenge to experience the religious and transcendental meaning of life by choosing a simple hardworking existence Wittgenstein's focus on ethics and discovering the sense of the world his conclusion that the question of the meaning of life makes no sense and his turning to experience the mystical aspect of the world Sartre's positing of freedom as the basis of human life stipulating a personal answer to the question of the meaning of life and Camus' view of the absurdity of life unalleviated by any personal meaning Guided by these views Lurie imparts new insight to ideas that underlie our concern with life's meaning such as the difference between attitudes toward life and beliefs and opinions about life the meaning of words versus the meaning of events shared meanings versus personal meanings and the link between ethics and personal identity Tracking the Meaning of Life is no mere dry philosophical study but a journey that dramatically illustrates the poignancy of the quest for meaning showing that along the way it gradually becomes more

obvious how personal meaning may be found in the pulsations of everyday life The book offers stimulating reading not only for scholars in philosophy but also for general readers who wish to see how their personal concerns are echoed in modern philosophical thought More than a description of a journey it is a map to anxieties and puzzlements we all face pointing to ideas that can guide readers on their own search for meaning

Assisted Death L. W. Sumner, 2011-07-07 L W Sumner explores the ethical and legal status of physician assisted suicide and euthanasia and argues powerfully that these forms of assisted death can claim the same justification as other widely accepted end of life practices He surveys the opposing views and legal precedents and develops a model regulatory policy for assisted death

People v. Kevorkian; Hobbins v. Attorney General, 447 MICH 436 (1994), 1994 99759

Medical Ethics, Ordinary Concepts and Ordinary Lives Christopher Cowley, 2007-11-13 Mainstream discussions of ethics often search for a problem solving theory or explore ontological status This book argues instead that the proper starting point should be the words and deeds of ordinary people in ordinary disagreements the ethical concepts in play can only derive full meaning within the context of ordinary human lives

Physician-Assisted Death James M. Humber, Robert F. Almeder, Gregg A. Kasting, 1994-02-04 Physician Assisted Death is the eleventh volume of Biomedical Ethics Reviews We the editors are pleased with the response to the series over the years and as a result are happy to continue into a second decade with the same general purpose and zeal As in the past contributors to projected volumes have been asked to summarize the nature of the literature the prevailing attitudes and arguments and then to advance the discussion in some way by staking out and arguing forcefully for some basic position on the topic targeted for discussion For the present volume on Physician Assisted Death we felt it wise to enlist the services of a guest editor Dr Gregg A Kasting a practicing physician with extensive clinical knowledge of the various problems and issues encountered in discussing physician assisted death Dr Kasting is also our student and just completing a graduate degree in philosophy with a specialty in biomedical ethics here at Georgia State University Apart from a keen interest in the topic Dr Kasting has published good work in the area and has in our opinion done an excellent job in taking on the lion s share of editing this well balanced and probing set of essays We hope you will agree that this volume significantly advances the level of discussion on physician assisted euthanasia Incidentally we wish to note that the essays in this volume were all finished and committed to press by January 1993
