### Sunak asks stores to cap basic food prices

No 10 in discussions with supermarkets over French-style approach to cost of living crisis

By Edward Maleski and Will Shawell

Prime Minister Rishi Sunak is planning to ask supermarkets to cap the prices of basic food items, a move that could see the government intervene in the market for the first time since the 1970s. The move is part of a broader effort to tackle the cost of living crisis, which has seen food prices rise sharply in recent months. Sunak is expected to announce the move in the coming weeks, after consultations with supermarket chains. The move would see the government set a maximum price for a range of basic food items, including bread, milk, and eggs. This is a similar approach to the one used in France, where the government has successfully capped the prices of basic food items. The move is expected to be controversial, as it would involve the government interfering in the free market. However, it is seen as a necessary step to help households struggling with the cost of living crisis.

### Trans lobby group helped NHS plan treatment of children

By Will Shawell, Edward Maleski and Will Shawell

A trans lobby group has helped the NHS plan the treatment of children, a move that has caused controversy. The group, known as the Gender Identity Development Programme (GIDP), has been working with the NHS to develop guidelines for the treatment of children. The move is part of a broader effort to tackle the cost of living crisis, which has seen food prices rise sharply in recent months. The NHS is expected to announce the move in the coming weeks, after consultations with the GIDP. The move would see the NHS set a maximum price for a range of basic food items, including bread, milk, and eggs. This is a similar approach to the one used in France, where the government has successfully capped the prices of basic food items. The move is expected to be controversial, as it would involve the NHS interfering in the free market. a world recession with dire consequences for the world's poor      Media, Sustainability and Everyday Life Geoffrey Craig, 2019-04-04 This book analyses representations of sustainable everyday life across advertising, eco reality television, newspapers, magazines and social media. It foregrounds the discursive and networked basis of sustainability and demonstrates how such media representations connect the home and local community to broader political, social and economic contexts. The book shows how green lifestyle media negotiate issues of sustainability in varying ways, reproducing the logic of existing consumer society while also sometimes providing projections of a more environmentally friendly existence. In this way, the book argues that everyday lifestyles are not an irredeemable problem for environmentalism but an important site of environmental politics.

**Sexism in the City** James Taylor, 2025-02-20 Sexism in the City is the first book to trace the history of women stockbrokers in the United Kingdom from the late nineteenth to the late twentieth centuries. Forgotten pioneers: these businesswomen fought against the odds to establish successful brokerages across the country and in the process challenged society's beliefs about women and money. The book also tells the story of how the nation's stock exchanges denied them membership for generations, mobilizing increasingly desperate arguments to try to justify their exclusion until women finally won the right to join the London Stock Exchange in 1973. Though historians have recently reassessed women's role in the development of capitalism, highlighting their roles as investors and entrepreneurs, they have assumed that because women were not members of stock exchanges, they were not active as financial intermediaries until modern times. By spotlighting the lives and careers of women who worked as stockbrokers outside male monopolized institutions, this book reframes the historical development of finance in several ways. It highlights the extent to which the seemingly gender-neutral institutions and practices of finance were in fact based on gendered ideologies and exclusions. It argues that focusing on institutions only reveals part of the financial ecosystem, meaning that we miss what was happening outside the formal market. And it challenges London-centric interpretations of financial history, asking questions about the financial cultures existing outside the metropolis. If we look

beyond the official exchanges and beyond London a more diverse financial environment comes into view The history uncovered in Sexism in the City also helps to address problems with financial culture in the twenty first century Current reform initiatives are unlikely to succeed unless they acknowledge that for hundreds of years professional identities and institutional structures in finance have been based on the denigration and marginalization of women Acknowledging the efforts of those female stockbrokers who challenged misogynistic beliefs and defied men s monopoly of high finance by forging their own careers is the first step towards imagining a different kind of market
