his and his country's ambitions For the first time Professor William Nestor has delved into the life and actions of Churchill to examine just how skillfully he manipulated events to place him in positions of power His thirst for power stirred political controversy wherever he intruded Those who had to deal directly with him either loved or hated him His enemies condemned him for being an egoist publicity hound double dealer and Machiavellian accusations that his friends and even he himself could not deny He could only serve Britain as a statesman and a reformer because he was a wily politician who won sixteen of twenty one elections that he contested between 1899 and 1955 The House of Commons was Churchill's political temple where he exalted in the speeches and harangues on the floor and the backroom horse trading and camaraderie Most of his life he was a Cassandra warning against the threats of Communism Nazism and nuclear Armageddon With his ability to think beyond mental boxes and connect far flung dots he clearly foretold events to which virtually everyone else was oblivious Yet he was certainly not always right and was at times spectacularly wrong This is the first book that explores how Churchill understood and asserted the art of power mostly through hundreds of his own insights expressed through his speeches and writings

Strange Allies Andrew Webster, 2019-07-02 Strange Allies examines three intersecting themes of fundamental importance to the international history of the period between the two world wars First and most broadly it is a study of the international history of the pivotal hinge years running from the onset of the Depression in late 1929 to the Nazi capture of power in Germany in early 1933 The second theme is the strategic relationship between Britain and France the critical dynamic in the management of global and European international relations during this time of great fluidity and uncertainty The most contentious and intractable issue that divided the two countries was the pursuit of international disarmament which forms the third theme of the book Strange Allies is based upon extensive research in British and French archives as well as in the archives of the League of Nations in Geneva The book's focus on 1929-31 in particular makes a major contribution to the international history of the interwar period by re-examining the security and strategic policies of the second Labour government in Britain and of foreign minister Aristide Briand in the post Locarno years in France For 1931-33 the book looks at the impact of the great financial and economic crisis of 1931 on security and disarmament planning in Britain and France It then considers the impact of the Anglo-French relationship on the instability of Europe and on the failure of the World Disarmament Conference This book is the first detailed study of the Anglo-French relationship during a critical period which saw a reshaping of the boundaries of global security Although the Anglo-French alliance is rightly seen to be pivotal to both the initial phase of implementing the Versailles settlement of 1919 and the efforts to contain Hitler and protect Europe after 1936 Strange Allies demonstrates the degree to which these states conflicting views of security were central to international relations in the years leading up to Hitler's accession to power Arms Control Robert E.
