Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future Can the genre actually provide glimpses of the world of tomorrow This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature Among the texts and topics examined are classic stories by Murray Leinster C L Moore and Cordwainer Smith 2001 A Space Odyssey and its sequels Japanese anime and Hong Kong cinema and electronic fiction

The Last Theorem Arthur C. Clarke, Frederik Pohl, 2008-08-05 Two of science fiction's most renowned writers join forces for a storytelling sensation The historic collaboration between Frederik Pohl and his fellow founding father of the genre Arthur C Clarke is both a momentous literary event and a fittingly grand farewell from the late great visionary author of 2001 A Space Odyssey The

Last Theorem is a story of one man's mathematical obsession and a celebration of the human spirit and the scientific method. It is also a gripping intellectual thriller in which humanity, facing extermination from all but omnipotent aliens, the Grand Galactics, must overcome differences of politics and religion and come together or perish. In 1637 the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem: "I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain." He also neglected to record his proof elsewhere. Thus began a search for the Holy Grail of mathematics, a search that didn't end until 1994 when Andrew Wiles published a 150-page proof. But the proof was burdensome, overlong, and utilized mathematical techniques undreamed of in Fermat's time, and so it left many critics unsatisfied, including young Ranjit Subramanian, a Sri Lankan with a special gift for mathematics and a passion for the famous Last Theorem. When Ranjit writes a three-page proof of the theorem that relies exclusively on knowledge available to Fermat, his achievement is hailed as a work of genius, bringing him fame and fortune. But it also brings him to the attention of the National Security Agency and a shadowy United Nations outfit called Pax per Fidem, or Peace Through Transparency, whose secretive workings belie its name. Suddenly Ranjit, together with his wife Myra de Soyza, an expert in artificial intelligence, and their burgeoning family find themselves swept up in world-shaking events; his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly. Meanwhile, unbeknownst to anyone on Earth, an alien fleet is approaching the planet at a significant percentage of the speed of light. Their mission: to exterminate the dangerous species of primates known as *Homo sapiens*. — *Arthur C. Clarke* Gary Westfahl, 2018-06-14

Already renowned for his science fiction and scientific nonfiction, Arthur C. Clarke became the world's most famous science fiction writer after the success of *2001: A Space Odyssey*. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise*, that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career, ranging from his forgotten juvenilia to the passages he completed for a final novel, *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent, solitary individuals, who avoid conventional relationships, represent his most significant prediction of the future, as they embody the increasingly common lifestyle of people in the twenty-first century. — *Firstborn* Arthur C. Clarke, Stephen Baxter, 2008-10-28

The Firstborn, the mysterious race of aliens who first became known to science fiction fans as the builders of the iconic black monolith in *2001: A Space Odyssey*, have inhabited the legendary master of science fiction, Sir Arthur C. Clarke's writing for decades. With *Time's Eye* and *Sunstorm*, the first two books in their acclaimed *Time Odyssey* series, Clarke and his brilliant co-author Stephen Baxter imagined a near future in which the *Firstborn* seek to stop the advance of human civilization by employing a technology

indistinguishable from magic Their first act was the Discontinuity in which Earth was carved into sections from different eras of history restitched into a patchwork world and renamed Mir Mir's inhabitants included such notables as Alexander the Great Genghis Khan and United Nations peacekeeper Bisesa Dutt For reasons unknown to her Bisesa entered into communication with an alien artifact of inscrutable purpose and godlike power a power that eventually returned her to Earth There she played an instrumental role in humanity's race against time to stop a doomsday event a massive solar storm triggered by the alien Firstborn designed to eradicate all life from the planet That fate was averted at an inconceivable price Now twenty seven years later the Firstborn are back This time they are pulling no punches They have sent a quantum bomb Speeding toward Earth it is a device that human scientists can barely comprehend that cannot be stopped or destroyed and one that will obliterate Earth Bisesa's desperate quest for answers sends her first to Mars and then to Mir which is itself threatened with extinction The end seems inevitable But as shocking new insights emerge into the nature of the Firstborn and their chilling plans for mankind an unexpected ally appears from light years away

Time's Eye Arthur C. Clarke, Stephen Baxter, 2005-03-01 Wonderfully entertaining a story that engrosses you with its dramatized ideas about the nature of existence You won't set the book down either to eat or sleep or work if you can help it Chicago Tribune In an instant Earth is carved up in time and reassembled like a huge jigsaw puzzle Suddenly the world becomes a patchwork of eras from prehistory to 2037 each with its own indigenous inhabitants The explanation for this cataclysmic event may lie in the ancient city of Babylon where two groups of refugees from 2037 three cosmonauts and three U N peacekeepers have detected strange radio signals The peacekeepers find allies in nineteenth-century British troops and in the armies of Alexander the Great The cosmonauts join forces with the Mongol horde led by Genghis Khan Both sides set out for Babylon vowing to win the race for knowledge as a powerful and mysterious entity watches waiting Praise for *Time's Eye* A rousing adventure The New York Times Book Review By the end when two of history's most ambitious conquerors meet we are so thoroughly invested in the characters we can't wait for the sequel Entertainment Weekly Editor's Choice A fast and engaging read Rocky Mountain News
