The New Prometheans Creative And Destructive Forces In Modern Science:

The new Prometheans Robert S. De Ropp,1972 **Technofutures, Nature and the Sacred** Celia

Deane-Drummond,Sigurd Bergmann,Bronislaw Szerszynski,2016-03-03 The capacity of human beings to invent construct and use technical artifacts is a hugely consequential factor in the evolution of society and in the entangled relations between humans other creatures and their natural environments Moving from a critical consideration of theories to narratives about technology and then to particular and specific practices Technofutures Nature and the Sacred seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology religion and society and using insights from the environmental humanities It works from both theoretical and practical contexts by using newly emerging case studies including geo engineering and soil carbon technologies and breaks open new ground by engaging theological scientific philosophical and cultural aspects of the technology religion nature nexus Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies and engaging critical theory common in sociological political and literary discourses the authors explore the implicit religious claims embedded in technology

The Many Faces Of Science Henry Byerly,2018-03-05 In The Many Faces of Science Leslie Stevenson and Henry Byerly masterfully and painlessly provide the information and the philosophical reflections students need to gain an understanding of the institution of modern science and its increasing impact on our lives and cultures In this second edition the authors update topics they explored in the first edition and present new case studies on subjects such as HIV and AIDS women in science and work done in psychology and the social sciences The authors also extend their discussion of science and values in addition to revising their study of science and technology to emphasize changes in scientific practice today Accessible and rich with case studies anecdotes personal asides and keen insight The Many Faces of Science is the ideal interdisciplinary introduction for nonscientists and scientists in courses on science studies science and society and science and human values It will also prove useful as supplementary reading in courses on science and philosophy sociology and political science

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 **Gospel According To Myself** Dr. John Pulpamampil,2017-02-05 In this unusual autobiography

started in 1975 and completed in 2016 the author narrates analyses his experiences in the different situations in which he had to take value based decisions and face the consequences The book provides interesting reading along with insights into the varied situations and behaviour of individuals and groups dealt with in the book Sociological and philosophical perspectives on the situations in Kerala Tamil Nadu Gujarat New Delhi and England are quite original and experience based Behavioural perspectives on the organisations where he worked are deep and unique **Churchill and the Bomb in War and Cold War** Kevin Ruane,2016-09-08 Covering the development of the atomic bomb during the Second World War the origins and early course of the Cold War and the advent of the hydrogen bomb in the early 1950s Churchill and the Bomb in

War and Cold War explores a still neglected aspect of Winston Churchill's career his relationship with and thinking on nuclear weapons Kevin Ruane shows how Churchill went from regarding the bomb as a weapon of war in the struggle with Nazi Germany to viewing it as a weapon of communist containment and even punishment in the early Cold War before in the 1950s advocating and arguably pioneering mutually assured destruction as the key to preventing the Cold War flaring into a calamitous nuclear war While other studies of Churchill have touched on his evolving views on nuclear weapons few historians have given this hugely important issue the kind of dedicated and sustained treatment it deserves In Churchill and the Bomb in War and Cold War however Kevin Ruane has undertaken extensive primary research in Britain the United States and Europe and accessed a wide array of secondary literature in producing an immensely readable yet detailed insightful and provocative account of Churchill's nuclear hopes and fears

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70

The Mirror of My Self John Pulpamampil, This is a revised version of an extraordinary autobiography first published in January 2017 by the Educreation Publishing House New Delhi under the title Gospel According to Myself with four new chapters added to it and also incorporating some changes in some parts the earlier chapters The new headings of the chapters reflect the new perspectives adopted on each of them with an emphasis on being a life long student even at the age of 71 The book contains four major parts a a comprehensive review of Jesuit training for priest hood based on personal experiences as a Jesuit trainee in the Madurai Province of Jesuits in India a a critical review of institution building for excellence in education and training in India focusing experiences in the Jawaharlal Nehru University New Delhi South Gujarat University Surat and Institute of Management in Government Thiruvananthapuram and c experiences in self management from the days of adolescence to the age of seventy and d a philosophy of life evolved by the author on the basis of his vast readings unique experiences in life and prolonged reflection and meditation on the deeper aspects of life lived in national and international contexts In all what he did value concerns have been central to his thinking and actions And nowhere was he ever free from conflicts due to his value concerns in life In his autobiography started in 1975 and completed in 2016 the author narrates and analyses his experiences in the different situations in which he had to take value based decisions and face the consequences for the actions The Philosophical perspectives on his religious experiences and value management conflicts outshine all other aspects of this extraordinary document The spirit of the author enters into a dialogue with those who read the story of his eventful life

Prometheus Carol Dougherty, 2006-01-30 Offering a comparative approach including visual material and film this much needed book provides an essential introduction to the Promethean myth and locates the nature of this compelling tale's continuing relevance through history from its origins in ancient Greece to its appearance in Romantic age works and twentieth century films

The Inky Digit of Defiance Tony Harrison, 2017-05-02 In this richly varied selection of Tony Harrison's provocative prose of the last fifty years the great poet of page stage and screen presents a lifetime's thinking about art and politics creativity and mortality In so doing he takes us

on an extraordinary journey through languages and across continents and millennia from his Nigerian Lysistrata to the British Raj of his version of Racine's Phèdre to post Communist Europe for the film Prometheus to a one off performance of The Kaisers of Carnuntum at the Roman amphitheatre in Austria on the Danube to the peace camp at Greenham Common and from a Leeds street bonfire celebrating the defeat of Japan by the new atomic bomb to wines made from the vines on volcanoes A collection of work filled with passion and humour that educates as it dazzles More than Yeats Eliot or Auden more than anyone writing in English this century and perhaps the two before that as well Harrison has demonstrated that verse drama remains a living artistic possibility Observer

The Science Fiction Dimensions of Salman Rushdie Yael Maurer, 2014-01-23 This book focuses on the science fictional dimensions of Rushdie's later novels Fury The Ground Beneath Her Feet Shalimar the Clown and Luka and the Fire of Life and Rushdie's first unpublished novel The Antagonist to show how the author's oeuvre moves towards a more consistent engagement with science fiction as a generic form and an ideological investment The author demonstrates how Rushdie recreates personal and national histories in a science fictional setting and mode and contends that the failure of his first novel Grimus may have led Rushdie away from SF for some time although he returns to it with a much firmer conviction and a much stronger voice in his later novels showing his commitment to this imaginative form which he describes in Fury as providing the best popular vehicle ever devised for the novel of ideas and metaphysics The science fictional mode is the most appropriate vehicle for expressing these thematic and ideological concerns and the organizing feature of Rushdie's oeuvre The author rereads the later novels in light of recent critical engagement with SF as a vehicle for reimagining national histories and as a potentially subversive tool for social and political engagement in a fictional realm **Newsletter of the Program on Public Conceptions of Science** Harvard University. Program on Public Conceptions of Science, 1972 *The Bookseller*, 1972
