The Competitiveness Of Industry In Ireland An International Perspective:

The Competitiveness of Industry in Ireland D. M. W. N. Hitchens, J. Esmond Birnie, 1994 This text evaluates the past performance and future prospects for Northern Ireland and the Republic of Ireland It explains the disappointing historical performance employment and living standards of the two Irish economies through examining the competitiveness at the sectoral level The Irish economies have failed to catch up with average UK and European levels the authors trace this to the productivity and size of major economic sectors Competitiveness Food Industry Bruce Traill, Eamonn Pitts, 1998 International competitiveness is a prime concern of food industries and governments around the world This book provides a review of the current thinking on competitiveness *An Economic History of Ireland Since Independence* Andy Bielenberg, Raymond Ryan, 2013-05-20 This book provides a cogent summary of the economic history of the Irish Free State Republic of Ireland It takes the Irish story from the 1920s right through to the present providing an excellent case study of one of many European states which obtained independence during and after the First World War The book covers the transition to protectionism and import substitution between the 1930s and the 1950s and the second major transition to trade liberalisation from the 1960s In a wider European context the Irish experience since EEC entry in 1973 was the most extreme European example of the achievement of industrialisation through foreign direct investment The eager adoption of successive governments in recent decades of a neo liberal economic model more particularly de regulation in banking and construction has recently led the Republic of Ireland to the most extreme economic crash of any western society since the Great Depression **The Legacy of Ireland's Economic Expansion** Peadar Kirby, Pdraig Carmody, 2013-10-18 Ireland underwent a dramatic economic and social transformation from the 1990s onwards earning it the title the Celtic Tiger Rapid economic growth was accompanied by substantial in migration However in the later 2000s Ireland is also experiencing a severe economic recession This book examines the nature and geographies of the Celtic Tiger focusing on the evolution of industries such as information and communication technology and pharmaceuticals It also examines the changing nature of social ties in cities trends amongst knowledge workers and the experiences of return migrants It concludes with reflections on the nature of the Celtic Tiger phenomenon and how this will shape Ireland's geography and society into the future This book was published as a special issue of Irish Geography **Irish Economic Development** Eoin O'Leary, 2015-02-20 This book offers a discerning narrative on the spectacular rise and fall of the so called Celtic Tiger economy It depicts Ireland as a micro state with a unique reliance on foreign assisted businesses driven in part by a favourable taxation regime It shows that rent seeking by trades unions and property developers contributed to the fall since 2002 Although the country's highly centralized government's pre disposition to lobbying has yielded international successes it has also resulted in recurring self inflicted crises since 1970 This volume shows how Ireland's export led growth is associated more with the attraction of foreign assisted businesses than with the development of critical masses of internationally competitive indigenous businesses

Although the success of foreign assisted businesses in the pharmaceutical ICT and finance sectors has been influenced by tax advantages many of these businesses have been involved in highly productive activity in Ireland over a number of decades. The problem of rent seeking is shown to have undermined Irish competitiveness in the internationally traded and sheltered sectors. The Irish policy mind set is shown to lean towards distribution rather than growth. While this has been advantageous for how Ireland Inc interacts with other governments and international businesses it has also resulted in a failure to resist the destructive effects of capture by lobbies. In conclusion this book considers future opportunities offered by the EU's smart specialization policy and future threats from increased international tax competition. It argues that unless Irish citizens and policymakers change deep seated attitudes and mind sets towards business development the country's performance for the next number of decades will more likely resemble serial under achievement than that of a high performing EU state.
