

other aquatic products and horses.

Color is not the only thing for which people are known or selectively bred. Finnage, or fin in seahorses, is another trait that gives certain types of fishes their uniqueness among the members of other aquatic vertebrates. Many seahorses are capable of adding ridges and extensions in order to better blend into their backgrounds. Often, fish with distinctive extensions are available in a wider assortment of colors and patterns because of the many generations that are needed in order to obtain the desired results. The authors of the book give several examples of other seahorses available to hobbyists and their associated color varieties.

This brilliant yellow tropical seahorse from the Caribbean is just one example of the colorful, captured species that are now available.
