

Concept of Probability

Joint Probability:

$$P(A \cup B) = P(A) + P(B) - P(A \cap B)$$

If A and B are mutually exclusive $A \cap B = \emptyset$ then

$$P(A \cup B) = P(A) + P(B)$$

Conditional Probability: the probability of one event is influenced by the outcome of another event.

$$P(A/B) = \frac{P(A \cap B)}{P(B)}$$

Independent Events: The occurrence of one event is not influenced by the occurrence of the other event.

$$P(A \cap B) = P(A)P(B)$$

$$P(A/B) = P(A)$$

The Concept Of Probability

Hans Reichenbach

The Concept Of Probability:

The Concept of Probability John Randolph Lucas, 1970 **The Concept of Probability in the Mathematical Representation of Reality** Hans Reichenbach, 2008 The first English translation of Hans Reichenbach's lucid doctoral thesis sheds new light on how Kant's Critique of Pure Reason was understood in some quarters at the time The source of several themes in his still influential *The Direction of Time* the thesis shows Reichenbach's early focus on the interdependence of physics probability and epistemology **An Elementary Introduction to the Theory of Probability** B. V. Gnedenko, A. YA. Khinchin, 2014-09-04 *The Meaning of the Concept of Probability in Application to Finite Sequences (Routledge Revivals)* Hilary Putnam, 2013-01-11 First published in 1990 this is a reissue of Professor Hilary Putnam's dissertation thesis written in 1951 which concerns itself with *The Meaning of the Concept of Probability in Application to Finite Sequences* and the problems of the deductive justification for induction Written under the direction of Putnam's mentor Hans Reichenbach the book considers Reichenbach's idealization of very long finite sequences as infinite sequences and the bearing this has upon Reichenbach's pragmatic vindication of induction *The Concept of Control* Savilla Alice Elkus, 1907 *The Theory of Probability* Hans Reichenbach, 1971 **The Scientific World-Perspective and Other Essays, 1931-1963** J. Giedymin, 2012-12-06 Though with considerable delay most of the writings of Polish logicians of the inter war period are now available in English This is not yet true of Polish philosophy In the present volume English speaking readers will find for the first time a sizeable collection of the articles of one of the most original and distinguished of Poland's philosophers of the present century Kazimierz Ajdukiewicz 1890-1963 To be sure Ajdukiewicz was a philosopher logician from the beginning of his career His first work of some importance a monograph entitled *From the Methodology of the Deductive Sciences* 1921 post dated two abstracts published in 1919-20 exhibited two features which were to become characteristic of the style of his later philosophy On the one hand the monograph was the result of Ajdukiewicz's deep interest in the systems of modern logic the foundations of mathematics in the properties of deductive systems and their relevance to philosophy on the other hand the monograph was an attempt at developing an understanding methodology in the sense of Gennan *Verstehende Methodologie* of deductive sciences i.e. a pragmatic study of axiomatic systems which would supplement purely formal investigations of those systems The former made him a close ally of logical empiricists the latter was rooted in the hermeneutic tradition of the second half of the 19th century Dilthey which spilled over into the 20th century Spranger and which was not cherished at all by logical empiricists **Pragmatic Logic** K. Ajdukiewicz, 2012-12-06 When asked in 1962 on what he was working Kazimierz Ajdukiewicz replied Several years ago Polish Scientific Publishers suggested that I prepare a new edition of *The Logical Foundations of Teaching* which I wrote before 1939 as a contribution to *The Encyclopaedia of Education* It was a small booklet covering elementary information about logical semantics and scientific methodology information which in my opinion was necessary as a foundation of teaching and as an element of the education of any teacher

When I recently set to preparing the new edition I rewrote practically everything and a booklet of some 100 pages swelled into a bulky volume almost five times bigger The issues have remained practically the same but they are now analysed much more thoroughly and the threshold of difficulty is much higher now The main stress has been laid on the methods used in the empirical sciences and within that field on the theory of measurement and the methods of statistical inference I am now working on the last chapter of the book concerned with explanation procedures and theory construction in the empirical sciences When that book which I intend to entitle Pragmatic Logic is completed I intend to prepare for the press Vol 2 of my minor writings 2 Language and Cognition which will cover some of my post war papers
