Study of Religions Joachim Wach,1958 A Comparative Study of Religions Y. Masih,2013-01-01 A Comparative Study of Religions has been written by a scholar who has occupied himself with the subject of religion for over fifty years But no finality can be claimed the reason is that religion deals with what is transcendent in the sense that it deals with what man is going to be Advaitism terms this futuristic end as becoming Brahman Jainism as regaining one's pristine glory theists as becoming gold fit for heaven However Bergson and other evolutionists would say that religion is a collective and cooperative effort of men to become gods This simply means the divinising of man what Aurobindo calls supermind They refer to a state beyond human ills beyond human infatuation and beyond the befogging of human intellect This is known in Jainism as sarvajnata One thing is clear that fighting with other human beings in the name of religion is subhuman As religious men we are fellow travellers in the direction of the realm of spirit Here the nomenclature of Hindus Muslims Christians etc ceases to be meaningful Of course we have to go very far and we have not made any beginning yet However at present the advaitic principle of differences Brahman can serve the purpose of harmonizing all religions Here we have adopted this principle Secondly the key concepts of different religions have been shown to mingle with one another **The Comparative Study**

Religious Worlds William E. Paden,2015-10-27 From Gods to ritual observance to the language of myth and the distinction between the sacred and the profane Religious Worlds explores the structures common to all spiritual traditions

Religion John Gaines Vaughan,2015-06-02 Excerpt from Religion A Comparative Study The author has a definite purpose in offering this book to the public He is aware that there are many valuable works on the subject of Comparative Religion He regards some of them as too voluminous and technical for the average reader who is seeking an intelligent understanding of the Great Religions of the world Others show unmistakable signs of having been made in Germany and as being a part of the destructive higher criticism that has done harm to the cause of Christianity Some of these volumes are admirable in every way but are so condensed they do not give a general survey of the field The present work will doubtless prove equally unsatisfactory to many readers but if others get as much pleasure and profit from its perusal as the author has in its preparation he will be well paid We have treated the subject under three general heads I The Science of Comparative

Religion II The History of Religions III The Comparison of Religions The religious idea is one and innate but as this idea is expressed by different peoples it is colored by the medium through which it passes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Considering Comparison Oliver Freiberger,2019-01-02 The comparative method is an integral part of religious studies All the technical terms that scholars of religion use on a daily basis such as ritual hagiography shrine authority fundamentalism hybridity and of course religion are comparative terms Yet comparison has been subject to criticism including postcolonialist and postmodernist critiques Older approaches are said to have used comparison primarily to confirm preconceptions about religion More recently comparison has been criticized as an act of abstraction that does injustice to the particular neglects differences and establishes a mostly Western power of definition over the rest of the world In this book Oliver Freiberger takes a closer look at how comparison works Revisiting critical debates and examining reflections in other disciplines including comparative history sociology comparative theology and anthropology Freiberger proposes a model of comparison that is based on a thorough epistemological analysis and that takes both the scholar's situatedness and his or her agency seriously Examining numerous examples of comparative studies Considering Comparison develops a methodological framework for conducting and evaluating such studies Freiberger suggests a comparative approach which he calls discourse comparison that confronts the omnipresent risks of decontextualization essentialization and universalization This book makes a case for comparison arguing that it is indispensable for a deeper analytical understanding of what we call religion The book is intended to enrich the practice of both aspiring and seasoned comparativists stimulate much needed further discussions about comparative methodology and encourage more scholars to produce responsible comparative studies

Nineteenth-Century Religious Thought in the West: Volume 3 Ninian Smart,John Clayton,Patrick Sherry,Steven T. Katz,1988-07-01 The successful three volumes of Nineteenth Century Religious Thought in the West provide a fresh appraisal of the most important thinkers of that time Soames essays centre on major figures of the period others cover topics trends and schools of thought between the French Revolution and the First World War

Classical Approaches to the Study of Religion Jacques Waardenburg,2017-01-23 Waardenburg's magisterial essay traces the rise and development of the academic study of religion from the mid nineteenth to the mid twentieth century outlining the establishment of the discipline its connections with other fields religion as a subject of research and perspectives on a phenomenological study of religion Furthermore a second part comprises an anthology of texts from 41

scholars whose work was programmatic in the evolution of the academic study of religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few
