Introduction to Congress ,1978 Governing Race Nina Moore,2000-09-30 Moore argues that there is a fundamental incompatibility between race and governance She examines the formal procedures used to enact the thirteen major civil rights laws and the policy concessions necessitated by the use of those procedures and notes the impact of the divisive nature of the politics of race upon procedure and substance Her analysis of 40 years of congressional civil rights lawmaking reveals that whenever race is introduced into the normal policy process that process breaks down In its place emerges an abnormal policy process one that is inordinately demanding with respect to skill input and support votes She concludes that the substantive provisions of policies produced by this process are too weak to reduce huge racial disparities in education housing and employment The reason race regularly generates abnormal process and policies is that it is too contentious for the standard governmental apparatus This apparatus is designed to redress problems and issues undergirded by some measure of consensus Race lacks

such a consensual undercurrent and therefore is incompatible with standard governance processes A provocative analysis of particular interest to scholars and researchers involved with American racial politics minorities and party politics Laws, Men and Machines (Routledge Revivals) Michael Foley, 2014-02-04 First published in 1990 Laws Men and Machines is an original interpretation of the lasting influence that Newtonian mechanics has had on the design and operation of the American political system The author argues that it is this mechanistic tradition that now instinctively shapes the way we conceive of analyse and evaluate American politics and that the Newtonian conception of the world still finds expression in the checks and balances of the American system
