From Skisport to Skiing E. John B. Allen, 1993 The first full length study of skiing in the United States this book traces the history of the sport from its utilitarian origins to its advent as a purely recreational and competitive activity During the mid 1800s inhabitants of frontier mining communities in the Sierra and Rocky mountains used skis for many practical reasons including mail and supply delivery hunting and railroad repair In some towns skis were so common that according to one California newspaper the ladies do nearly all their shopping and visiting on them But it was Norwegian immigrants in the Midwest clinging to their homeland traditions who first organized the skisport Through the founding of local clubs and the National Ski Association this ethnic group dominated American skiing until the 1930s At this time a wave of German immigrants infused America with the ethos of what we today call Alpine skiing This type of skiing became increasingly popular especially in the East among wealthy collegians committed to the romantic pursuit of the strenuous life Ski clubs proliferated in towns and on college campuses and specialized resorts cropped up from New England to California At the same time skiing became mechanized with tows and lifts and the blossoming equipment and fashion industries made a business of the sport On the eve of World War II as the book concludes its story all the elements were in place for the explosion in recreational and competitive skiing
