Skill Wars Winning The Battle For Productivity And Profit:

Skill Wars Edward E. Gordon, 2012-05-23 Skill Wars shows how to increase productivity and profits by making investments in human capital development. It addresses the disparity between the available jobs and available workers. By education and training, only 20% of all American workers can fit well into our demanding high tech workplace. How do we train the 80%? Skill Wars defines the race between advanced technology investment and human resources investment and shows managers how to measure that investment. It introduces a Human Capital Scoreboard of seven new business management measurement tools including a more accurate calculation of ROI Return on Investment for employee performance improvement programs. It also provides case studies of how quality training can deliver on more problem solving thinking skills. It has a foreword by Joseph Boyett author of The Guru Guide and Workplace 2000. Skill Wars is a basic workplace performance primer that presents complex issues in a simple language and format that will move both business leaders and the American public to give their popular support. There are few viable alternatives. Gordon believes that only at great peril can Americans continue to largely ignore the workplace as an important arena that helps structure learning for life.

Global Leadership Marshall Goldsmith, Cathy Greenberg, Alastair Robertson, Maya Hu-Chan, 2003-04-28 The follow up to Marshall Goldsmith's 500,000 copy bestseller The Leader of the Future. Global Leadership: The Next Generation systematically identifies what tomorrow's leaders will need to know, do, and believe in order to successfully lead the global enterprise of the future. Drawing on the results of an extraordinary 2 year Accenture study of emerging business leaders, this book shows why the skills of today's global leaders won't be enough and why tomorrow's leaders won't resemble today's. Goldsmith and his co-authors first identify five new factors of leadership and

their implications global thinking appreciation of diversity technological savvy a willingness to partner and an openness to sharing leadership They explain what it will mean to lead in an era where intellectual capital is the dominant source of value how to lead people whose backgrounds and values may be radically dissimilar from yours and why achieving personal self mastery is now a fundamental prerequisite for leading others From the evolution of federated semi autonomous organizational structures to the personal leadership challenges now arising from globalism this book offers unprecedented insights into the new challenges of leadership and what it will take to meet them **The Palgrave International**
