Fuzzy Logic and the Internet Masoud Nikravesh, Lofti A. Zadeh, 2012-11-02 With the daily addition of million documents and new users there is no doubt that the World Wide Web WWW or Web shortly is still expanding its global information infrastructure Thanks to low cost wireless technology the Web is no more limited to homes or offices but it is simply everywhere The Web is so large and growing so rapidly that the 40 million page WebBase repository of Inktomi corresponds to only about 4% of the estimated size of the publicly indexable Web as of January 2000 and there is every reason to believe these numbers will all swell significantly in the next few years This unrestrainable explosion is not bereft of troubles and drawbacks especially for inexperienced users Probably the most critical problem is the effectiveness of Web search engines though the Web is rich in providing numerous services the primary use of the Internet falls in emails and information retrieval activities Focusing in this latter any user has felt the frustrating experience to see as result of a search query

overwhelming numbers of pages that satisfy the query but that are irrelevant to the user

Levitin,2014-08-18 Two of the most important social skills in humans are the ability to determine the moods of those around us and to use this to guide our behavior To accomplish this we make use of numerous cues Among the most important are vocal cues from both speech and non speech sounds Music is also a reliable method for communicating emotion It is often present in social situations and can serve to unify a group s mood for ceremonial purposes funerals weddings or general social interactions Scientists and philosophers have speculated on the origins of music and language and the possible common bases of emotional expression through music speech and other vocalizations They have found increasing evidence of commonalities among them However

the domains in which researchers investigate these topics do not always overlap or share a common language so communication between disciplines has been limited The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music speech and non verbal vocalizations This includes natural sounds produced by human and non human primates as well as synthesized sounds Research methodology includes survey behavioral and neuroimaging techniques investigating adults as well as developmental populations including those with atypical development Studies using laboratory tasks as well as studies in more naturalistic settings are included
