How Russia Learned to Talk Stephen Lovell,2020-02-27 Russia in the late nineteenth century may have been an autocracy but it was far from silent In the 1860s new venues for public speech sprang up local and municipal assemblies the courtroom and universities and learned societies Theatre became more lively and vernacular while the Orthodox Church exhorted its priests to become better preachers Although the tsarist government attempted to restrain Russia s emerging orators the empire was entering an era of vigorous modern politics All the while the spoken word was amplified by the

written the new institutions of the 1860s brought with them the adoption of stenography Russian political culture reached a new peak of intensity with the 1905 revolution and the creation of a parliament the State Duma whose debates were printed in the major newspapers Sometimes considered a failure as a legislative body the Duma was a formidable school of modern political rhetoric It was followed by the cacophonous freedom of 1917 when Aleksandr Kerensky dubbed Russia's persuader in chief emerged as Russia's leading orator only to see his charisma wane The Bolsheviks could boast charismatic orators of their own but after the October Revolution they also turned public speaking into a core ritual of Soviet democracy The Party's own gatherings remained vigorous if also sometimes vicious throughout the 1920s and here again the stenographer was in attendance to disseminate proceedings to a public of newspaper readers or Party functionaries *How Russia Learned to Talk* offers an entirely new perspective on Russian political culture showing that the era from Alexander II's Great Reforms to early Stalinism can usefully be seen as a single stenographic age All Russia's rulers whether tsars or Bolsheviks were grappling with the challenges and opportunities of mass politics and modern communications In the process they gave a new lease of life to the age-old rhetorical technique of oratory
