From Tao to Psychology Julian Laboy, 2012-06-30 In Western territories the last two centuries have been demanding many so called scientific fields of study a set of ideas that would change some of their traditional worldviews These new ideas come from another set of worldviews that run parallel or have very similar discursive direction to traditional Eastern perspectives In the

West this is happening in the fields of Psychology Biology Neurosciences Physics and others On the other hand Eastern perspectives that share similar views with the relatively new Western ideas are Buddhism Taoism and Hinduism This book will concentrate on the example of the similarities between specific theories in Psychology and Classical Taoism Those similarities can be seen in three themes union or separation of mind and body union or separation of reason and emotions and finally the construction or representation of knowledge The primary goal is to see the possibilities of sharing and learning from both sides of the world to walk a bridge that unites them This is an introduction to the communication between East and West that is already taking place in many parts of the world

China Developing George Fusun Ling,2008 This book deals with the intellectual foundation of the sociopolitical economic and legal systems of developing countries using a methodological approach It calls for not only the need to search for a country s cultural identity but also a need to analyze the prevalent concepts important to a contemporary modern society such as the respect for an individual human rights freedom equality democracy and the universal respect for law Based on the author s lifelong reflection on why some of these deeply treasured Western values and institutions have not been useful in developing democracy in Asia it examines which values are applicable and which are not to Asian emerging societies Using China s historical and contemporary attempts in modernization and development the author suggests that all mighty rivers are confluences of multiple tributaries Likewise an emerging society has to recognize that the dynamism of its history would also be derived from a confluence of multiple cultural traditions As a valuable resource for decision makers of developing countries this book will help to shed some light on the potential pitfalls and fallacies they may encounter in their search for a cultural identity and values to subscribe to among the many that are circulating in our globalized world Sample Chapter s Chapter 1 Introduction 164 KB Contents Respect for the Individual Person and Individualism Human Rights and Individual Rights Freedom from Want and Freedom of Choice Equality and Respect for Differences Democracy and the Democratic Process Law and Order Readership Policy makers of developing countries students undergraduates and graduates teachers and all intellectuals concerned with the development of their own countries general readership

Riding the Wind with Liezi Ronnie Littlejohn,Jeffrey Dippmann,2012-01-02 The Liezi is the forgotten classic of Daoism Along with the Laozi Daodejing and the Zhuangzi it s been considered a Daoist masterwork since the mid eighth century yet unlike those well read works the Liezi is little known and receives scant scholarly attention Nevertheless the Liezi is an important text that sheds valuable light on the early history of

Daoism particularly the formative period of sectarian Daoism We do not know exactly what shape the original text took but what remains is replete with fantastic characters whimsical tales paradoxical aphorisms and philosophically sophisticated reflection on the nature of the world and humanity's place within it Ultimately the Liezi sees the world as one of change and indeterminacy Arguing for the Liezi's historical philosophical and literary significance the contributors to this volume offer a fresh look at this text using contemporary approaches and providing novel insights The volume is unique in its attention to both philosophical and religious perspectives

The Many Faces of Coincidence Laurence Browne, 2017-11-10 Although much has been said and written about coincidences there is a marked absence when it comes to the development of a comprehensive model that incorporates the many different ways in which they can be understood and explained One reason for this omission is undoubtedly the sharp divide that exists between those who find coincidences meaningful and those who do not with the result that the conclusions of the many books and articles on the subject have tended to fall into distinct camps The Many Faces of Coincidence attempts to remedy this impasse by proposing an inclusive categorisation for coincidences of all shapes and sizes At the same time some of the implications arising from the various explanations are explored including the possibility of an underlying unity of mind and matter constituting the ground of being

Nurturing a Daoist-Inspired Classroom Pedagogy Through the Contemplative Lenses of Teacher Diaries David McLachlan Jeffrey, 2024-08-01 The harmonizing influence of ancient Daoist philosophy is of much relevance to the world in which we live today and this is especially so in the field of global education Among the growing numbers of contemporary teachers and scholars who nurture Daoist wisdom in their classrooms this book takes the unique pathway of considering its applications through the contemplative lenses of teacher diaries Its South African born author has taught academic English for over three decades in Japan the Middle East and the People's Republic of China Since early childhood he has infused his fascination for Daoist wisdom with his enjoyment of writing diaries and in ways that derive insights into the compassionate frugal and humble foundations of Daoist inspired pedagogies within contemporary classroom environments This book presents Daoist wisdom in terms of it being the Supreme Ultimate of all ways It introduces the classical Daoist texts of the Laozi the Zhuangzi and the Liezi and shares a short historical overview of Daoism with its growing global influence As such it

emphasizes that Daoist inspired pedagogies encourage a delicate balance between intuitive insights and intellectual analysis and in ways that are not antagonistic toward each other but which dance together as one In this regard the role of meditation during the undertaking of diaries is specifically highlighted concerning its propensity to bring one into the present moment pacify racing thoughts and transcend the ego It also shows how a meditative state of mind that accompanies the reading writing and analysis of the diary entries contributes to deeper self discernment along with unique intuitive insights related to oneself as a teacher and the classroom environment In addition this book describes how the Wordsmith Tools Program and the Book of Changes can be used as additional approaches to analyzing thought patterns within the diary entries and how these also nurture inward contemplations and the intuitive insights that accompany them Thereafter considerations based on the applications of core Daoist principles for classroom pedagogies are filtered through the contemplative lenses of teacher diaries These principles are the unintentional integrity of de the complementary duality of yin yang the cosmic vitality of qi the self so ness of ziran the unforceful spontaneity of wuwei and the unblemished purity of pu This book illustrates through its diary lenses how these six Daoist principles can be nurtured in ways that contribute to a scholarliness that is grounded in an equal appreciation for the logical applications of intelligence along with the uniqueness of intuitive creativity which cannot be explicitly taught but which spontaneously arises from within the deep reservoirs of intuitive wisdom which exist within the true selves of everyone In addition this book shares pearls of Daoist wisdom for teachers from within the poetic chapters of the Laozi as well as within the amusingly enlightening stories in the Zhuangzi and the Liezi such that their ancient teachings can be applied to Daoist inspired pedagogies and nurtured in ways that unite the joyfulness and scholarly efficacy of both teaching and learning It is shown how doing so enhances a sense of awe wonder openness and contemplative oneness within the classroom environment making it a happier more contented and more meaningful place for both teachers and students
