The Pragmatics of Governmental Discourse Ayan-Yue Gupta,2024-08-02 This book presents a novel methodological framework for analysing governmental discourse It involves combining pragmatist perspectives on language with computational sociolinguistics and large language models LLMs The first half discusses traditional critical approaches to investigating discursive practices principally those employing Critical Discourse Analysis CDA and those based on methods developed by Michel Foucault These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area It is argued that to understand the grounding of social structures and power relations

in discourse we must begin with a systematic account of how meaning is contextually fixed It is proposed that a pragmatist reading of Foucault's arguments about governmentality offers a productive framework for discourse analysis To illustrate the advantages of this framework the book presents a case study of the British government's adoption of resilience sustainability and wellbeing discourses in the period 2000-2020 A dataset of 179 million tokens sampled from approximately 170 000 government documents is used to illustrate how this framework can be combined with natural language processing NLP to make robust inferences This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP Importantly the book demonstrates how LLMs can be harnessed to bring new perspectives to long standing sociological questions
