*Revelations* Jean Arthur Jones,2013-02 This collection of 44 poems by Jean Arthur Jones is edited and published by Bruce Whealton It reflects the editor s personal impression of what are the best poems of the many that have been written by Mr Jean Arthur Jones In writing this it is implied that some of the poems chosen may reflect personal preferences and as such these poems may represent the editor s favorite poems by Jean Jones This is inevitable as it is difficult to find any objective sense of the best when describing poetry The poems represent a range of subjects and the order was chosen purposefully However the poems are not ordered in chronological order of when the poems were written or when they were published One of the editor s favorite collections by Jean Jones is the Angel of Death poetry collection That subject as such has received the most attention in this collection Some advice I received within the past couple years from Jean was about honesty to be honest always in one s poetry And to ask oneself does it read as honest I think that is a theme I ve found in the poetry of Jean Jones Sometimes you will read about his raw emotions and at other times you experience his feelings along with his observations about the world life death God faith good and evil Some poems draw upon some rather deep literary sources of inspiration Other poems draw upon the every day experiences I think all readers will find that his poems vary in complexity and thus defy simple characterization I m not aware of too many poets that similarly have such varied style in their writing

**The Occult Mind** Christopher Lehrich, 2012-08-17 Given the historical orientation of philosophy is it unreasonable to suggest a wider cast of the net into the deep waters of magic By encountering magical thought as theory we come to a new understanding of a thought that looks back at us from a funhouse mirror from The Occult Mind Divination like many critical modes involves reading signs and magic more generally can be seen as a kind of criticism that takes the universe seen and unseen known and unknowable as its text In The Occult Mind Christopher I Lehrich explores the history of magic in Western thought suggesting a bold new understanding of the claims made about the power of various belief systems In closely interlinked essays on such disparate topics as ley lines the Tarot the Corpus Hermeticum writing and ritual in magical practice and early attempts to decipher Egyptian hieroglyphics Lehrich treats magic and its parts as an intellectual object that requires interpretive zeal on the part of readers observers Drawing illuminating parallels between the practice of magic and more recent interpretive systems structuralism deconstruction semiotics Lehrich deftly suggests that the specter of magic haunts all such attempts to grasp the character of knowledge Offering a radical new approach to the nature and value of occult thought Lehrich's brilliantly conceived and executed book posits magic as a mode of theory that is intrinsically subversive of normative conceptions of reason and truth In elucidating the deep parallels between occult thought and academic discourse Lehrich demonstrates that sixteenth century occult philosophy often touched on issues that have become central to philosophical discourse only in the past fifty years
