A Collector's Guide to Rock, Mineral, & Fossil Localities of Utah James R. Wilson, 1995 With the tremendous growth of population in this and neighboring states there are more collectors than ever before and with the rapidly escalating prices for mineral and fossil specimens in the retail market there is a great demand for displayable material. It has become necessary for professional geologists, hobby collectors, and commercial collectors to recognize each others existence and to try to work together within a framework of regulation, courtesy, and common sense so that material of scientific value is not lost and undue restrictions are not placed upon collecting. There is a continuing need for collectors and professionals to work together with resource managers and legislators to develop workable laws and rules affecting the collecting of minerals and fossils. This publication contains detailed information about collecting areas divided by county to make for ease of use. Each collecting area contains information about the minerals, rocks, or fossils present, map recommendations, and other helpful tips on getting to the sites. The Hamlyn Guide to Minerals, Rocks and Fossils W. R. BISHOP, 1992 *The Hamlyn Guide to Minerals, Rock and Fossils* Roger Hamilton, 1992 The Nature Trail Book of Rocks & Fossils Martyn Bramwell, 1983 Outlines the history of Earth's continents, explains how different types of rocks and fossils were formed, and discusses minerals, crystals, gemstones, and fossil identification. **VNR Color Dictionary of Minerals & Gemstones** Michael O'Donoghue, 1982 *The New Walford Guide to Reference Resources* Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information, saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise, look no further. In addition to print sources, The New Walford naturally covers an extensive range of reference sources such as digital databanks, digital reference services, electronic journal collections, meta-search engines, networked information services, open archives, resource discovery services, and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy to use, and intuitive.
