Birds: ID Insights Dominic Couzens, 2015-01-29 Birds ID Insights is ideal for birders of all levels. Its unique layout, comparing the plumages of similar pairs and groups of species, makes it perfect for identifying the more difficult birds found in Britain and other parts of north west Europe. It has more images showing how to age birds than any comparable guide, and its handy compact size makes it practical for taking out into the field. The book is based on a long running series of identification features in Bird Watching magazine. Author Dominic Couzens and artist David Nurney have spent years compiling the field notes and artworks for this series, and here their efforts are drawn together and made complete in a single volume that is easy to carry in the field and practical for birders to use. In addition, they have expanded the species list from the magazine series and added many new birds, including the likes of Subalpine Warbler, Short-toed Lark, and Red-rumped Swallow. In total, the book covers more than 230 species, with easy-to-identify species such as Magpie and Kingfisher given minimal coverage, so that the more difficult ID issues can be covered as fully as possible.

Stolen Song Eliza Zingesser,2020-03-15 Stolen Song documents the act of cultural appropriation that created a founding moment for French literary history the rescripting and domestication of troubadour song a prestige corpus in the European sphere as French This book also documents the simultaneous creation of an alternative point of origin for French literary history a body of faux archaic Occitanizing songs Most scholars would find the claim that troubadour poetry is the origin of French literature uncomplicated and uncontroversial However Stolen Song shows that the Frenchness of this tradition was invented constructed and confected by francophone medieval poets and compilers keen to devise their own literary history Stolen Song makes a major contribution to medieval studies both by exposing this act of cultural appropriation as the origin of the French canon and by elaborating a new approach to questions of political and cultural identity Eliza Zingesser shows that these questions usually addressed on the level of narrative and theme can also be fruitfully approached through formal linguistic and manuscript oriented tools
