The Healing Power of a Whole Foods, Plant-based Diet: A Nutrition Prescription for Cancer Meghan Adelman (Mrs), 2017 Chronic disease is quickly overtaking infectious diseases as one of the biggest threats to population health worldwide Egger 2012 Studies have shown that plant based diets are effective at reducing prevalence but are also a viable complimentary treatment approach to healing Further investigation is needed into how plant based diets can reduce risk of recurrence specifically as it relates to a cancer diagnosis The Ceres Project is an organization that provides a healing foods philosophy to the care of cancer patients through meal delivery programs at low to no cost The aim of this research study was to implement the first trial of The Ceres Transition Program which tested three treatment groups to determine what manner of additional support is needed for clients to establish a long term dietary commitment to the Ceres food philosophy A total of n 34 participants were randomly assigned to 4 groups 3 treatment groups and a control that received only cash to use at the individual s discretion Two groups received three nutrition and cooking classes held over the course of eight weeks in conjunction with a cash stipend or vegetable box supplement The final treatment group strictly received a vegetable box for eight weeks Pre post surveys were implemented to evaluate baseline and endline eating behaviors by phone Although the study lacked adequate sample sizes preliminary data suggested that both cooking skills and cooking attitudes improved over

all three treatment groups Increased sample sizes for the next trial will allow for further manipulation of the data to reveal specifics between class and control and whether fruit and vegetable consumption increased with the intervention Lastly it will be important to understand whether the dietary recommendations lasted past six months to a year thereby demonstrating a long term behavior change Implications for policy should focus on increasing SNAP EBT transfers for farmer s markets to also include Community Supported Agriculture CSA deliveries to those living with cancer The rationale for this is that a debilitating illness significantly effects energy levels necessary for shopping for and preparing healthy food due to cancer treatment Eliminating this barrier may help to increase fruit and vegetables consumption during this challenging period Finally establishing programs that can offer nutrition and cooking education with a Food as Medicine philosophy should be incorporated into the treatment of chronic illness in primary care settings as it may help interrupt the progression of red flag markers into a confirmed diagnosis

Dr. Mao's Secrets of Longevity Cookbook Maoshing Ni,2013-01-01 The international bestselling author of Secrets of Longevity shares seventy five simple and delicious recipes for living a healthier happier and longer life A thirty eighth generation practitioner of Chinese medicine Dr Mao has helped countless patients and readers bolster their health and increase their longevity Now he builds on the advice shared in his previous books with this collection of kitchen friendly palate pleasing recipes designed to enhance wellness in a variety of ways Each recipe specifies its healthful benefits whether it increases metabolism or reduces inflammation fights high cholesterol or aids detoxification Recipes include Honey Glazed Masala Chicken with Apricots Immune Boost Borscht with Porcini Mushrooms and Spicy Tri color Pepper Beef with Himalayan Gojiberry Dr Mao also shares his signature Anti Aging Brain Mix and Brain Tonic A simple list of life extending foods is also included along with a list of in season bounty and a handy health glossary

Whole T. Colin Campbell,Howard Jacobson,2013-05-07 New York Times Bestseller What happens when you eat an apple The answer is vastly more complex than you imagine Every apple contains thousands of antioxidants whose names beyond a

few like vitamin C are unfamiliar to us and each of these powerful chemicals has the potential to play an important role in supporting our health. They impact thousands upon thousands of metabolic reactions inside the human body. But calculating the specific influence of each of these chemicals isn't nearly sufficient to explain the effect of the apple as a whole. Because almost every chemical can affect every other chemical, there is an almost infinite number of possible biological consequences. And that's just from an apple. Nutritional science, long stuck in a reductionist mindset, is at the cusp of a revolution. The traditional gold standard of nutrition research has been to study one chemical at a time in an attempt to determine its particular impact on the human body. These sorts of studies are helpful to food companies trying to prove there is a chemical in milk or pre-packaged dinners that is good for us, but they provide little insight into the complexity of what actually happens in our bodies or how those chemicals contribute to our health. In *The China Study*, T. Colin Campbell alongside his son Thomas M. Campbell revolutionized the way we think about our food with the evidence that a whole food plant-based diet is the healthiest way to eat. Now in *Whole*, he explains the science behind that evidence, the ways our current scientific paradigm ignores the fascinating complexity of the human body, and why, if we have such overwhelming evidence that everything we think we know about nutrition is wrong, our eating habits haven't changed. *Whole* is an eye-opening paradigm-changing journey through cutting-edge thinking on nutrition, a scientific tour de force with powerful implications for our health and for our world.

A Malibu Mom's Manifesto on Fresh, Whole Foods June Louks, 2014-10-09. A Family's Adventure In Feeling Great And Healing Our Planet. Inside you'll find a simple guide to infusing your family's meals with fresh whole foods.
