**The Globalization of Addiction** Bruce K. Alexander, 2008-07-03 The Globalization of Addiction presents a radical rethink about the nature of addiction Scientific medicine has failed when it comes to addiction There are no reliable methods to cure it prevent it or take the pain out of it There is no durable consensus on what addiction is what causes it or what should be done about it Meanwhile it continues to increase around the world This book argues that the cause of this failure to control addiction is that the conventional wisdom of the 19th and 20th centuries focused too single mindedly on the afflicted individual addict Although addiction obviously manifests itself in individual cases its prevalence differs dramatically between societies For example it can be quite rare in a society for centuries and then become common when a tribal culture is destroyed or a highly developed civilization collapses When addiction becomes commonplace in a society people become addicted not only to alcohol and drugs but to a thousand other destructive pursuits money power dysfunctional relationships or video games A social perspective on addiction does not deny individual differences in vulnerability to addiction but it removes them from the foreground of attention because social determinants are more powerful This book shows that the social circumstances that spread addiction in a conquered tribe or a falling civilisation are also built into today's globalizing free market society A free market society is magnificently productive but it subjects people to irresistible pressures towards individualism and competition tearing rich and poor alike from the close social and spiritual ties that normally constitute human life People adapt to their dislocation by finding the best substitutes for a sustaining social and spiritual life that they can and addiction serves this function all too well The book argues that the most effective response to a growing addiction problem is a social and political one rather than an individual one Such a solution would not put the doctors psychologists social workers policemen and priests out of work but it would incorporate their practices in a larger social project The project is to reshape society with enough force and imagination to enable people to find social integration and meaning in everyday life Then great numbers of them would not need to fill their inner void with addictions

*The Self Psychology of Addiction and its Treatment* Richard B. Ulman, Harry Paul, 2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new

ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date *Harm Reduction* G. Alan Marlatt, Mary E. Larimer, Katie Witkiewitz, 2011-12-07 From addictions treatment pioneer G Alan Marlatt and associates this is the authoritative work on harm reduction its principles strategies and practical applications Contributors review programs that have been developed and tested for a range of high risk behaviors including problem drinking tobacco use illicit drug use and risky sexual behavior Flexible tailored culturally competent treatment approaches are described for marginalized and underserved communities The volume also explores philosophical and policy related debates surrounding this growing movement New to This Edition Reflects significant advances in research and clinical practice Chapters on the current status of the field applications to psychotherapy and treatment of dual disorders Chapters on additional populations adolescent drinkers and Hispanic Latino and Asian American substance users and an additional substance cannabis

**Harm Reduction Psychotherapy** Andrew Tatarsky, 2007-06-10 This ground breaking volume provides readers with both an overview of harm reduction therapy and a series of ten case studies treated by different therapists that vividly illustrate this treatment approach with a wide variety of clients Harm reduction is a framework for helping drug and alcohol users who cannot or will not stop completely\_ the majority of users\_ reduce the harmful consequences of use Harm reduction accepts that abstinence may be the best outcome for many but relaxes the emphasis on abstinence as the only acceptable goal and criterion of success Instead smaller incremental changes in the direction of reduced harmfulness of drug use are accepted This book will show how these simple changes in emphasis and expectation have dramatic implications for improving the effectiveness of psychotherapy in many ways From the Foreword by Alan Marlatt Ph D O This ground breaking volume provides readers with both an overview of harm reduction therapy and a series of ten case studies treated by different therapists that vividly illustrate this treatment approach with a wide variety of clients In his introduction Andrew Tatarsky describes harm reduction as a new paradigm for treating drug and alcohol problems Some would say that harm reduction embraces a paradigm shift in addiction treatment as it has moved the field beyond the traditional abstinence only focus typically associated with the disease model and the ideology of the twelve step approach Others may conclude that the move toward harm reduction represents an integration of what Dr Tatarsky describes as the O basic principles of good clinical practice O into the treatment of addictive behaviors O Changing addiction behavior is often a complex and complicated process for both client and therapist What seems to work best is the development of a strong therapeutic alliance the right fit

between the client and treatment provider The role of the harm reduction therapist is closer to that of a guide someone who can provide support and guidance throughout the difficult journey The therapist guide offers validation and respect for each client along with willingness to meet the person where he or she is on the journey and to help them achieve the next step toward their goal O
