

■ It is not easy to implement strategy 2.

- Because of no-hair theorems it seems impossible to reproduce the huge degeneracy of BH states using low-energy gravity theory

■ We can circumvent this difficulty using an effective 2D description of the BH or BB

- For spherical symmetric BH and BB thermodynamics seems to be determined completely by the 2D (r,t) sections of the spacetime. Only spherical perturbations should enter in the entropy computation
- 2D gravity is a topological theory (as 3D gravity)
- Pure gauge degrees in the bulk become physical on the boundary
- We can calculate the entropy of the 2D BH first finding a duality (e.g ADS/CFT) between bulk gravity and a boundary theory then counting states in the 1D boundary theory
