1911-1980 received his PhD in English literature from Cambridge University and taught in the United States and Canada. He is best known, however, as the founding father of media studies. McLuhan was Director of the Center for Culture and Technology at the University of Toronto. Among his ground-breaking works on the psychic and social dimensions of communication technology are *The Gutenberg Galaxy* (1962), *Understanding Media: The Extensions of Man* (1964), and *The Medium is the Massage: An Inventory of Effects* (1967). Michel Moos' premise is that Marshall McLuhan's importance derives from his achievements in rethinking the entire process of education and training itself, not with his popular fame as media guru. He analyzes McLuhan's work from the feedback effect; his vision continues to provide, rather than from the perspective of interpreting McLuhan's pronouncements on the electronic media. Moos contrasts McLuhan's thoughts with those of such thinkers as Roland Barthes, Fredric Jameson, Friedrich Kittler, Donna Haraway, and Deleuze and Guattari, and renders an updated account of the effect of the mass media on our society and ourselves. The concept 'the medium is the message' is the hub around which Marshall McLuhan's explorations revolved. McLuhan's interests ranged from sixteenth-century literature to twentieth-century business practices. With wit and literary flair, he reported the media's influence on society and on the individual. He concluded that we could not escape being transformed by the forces that are hidden deeply within the electronic telecommunications revolution of the sixties. For McLuhan, the new mediums of film, television, and the emerging realm of the digital were the modern equivalent of Gutenberg's printing press.

Essays by M. McLuhan, Edited and with a Commentary by M. A. Moos. Harley Parker, Gary Genosko, 2025-05-15. This is the first book about the life and work of Harley Parker (1915-1992), Canadian museum exhibition designer, typographer, and painter. As friend and collaborator of media luminary Marshall McLuhan, Parker's influence extended far beyond the realm of art. In this groundbreaking intellectual biography, Genosko shows that Parker's unique perspective on museums is based on his application of McLuhan's medium theory to exhibition design. His emphasis on the role of the senses anticipated much of contemporary sensory studies, which will bring his work into focus for a new generation of scholars. A highlight of Parker's career as Head of General Display at Toronto's Royal Ontario Museum (1957-1968) was his *Hall of Invertebrate Fossils*, which opened to considerable acclaim in early 1967. That same year, he mounted a multimedia gallery at the Museum of the City of New York. These milestones underscore Parker's profound impact on museum studies and communication theory. Central to this comprehensive study is the rediscovery of Parker's lost manuscript *The Culture Box*, which would have confirmed his role as a central figure in the Toronto School of Communication. Had it not been lost for some fifty years, scholars in communication, cultural, and museum studies will benefit from this exploration of Parker's thought, as will those interested in sensory studies and the enduring value of McLuhan's ideas.

Transferred Illusions Marilyn Deegan, Kathryn Sutherland, 2016-02-24 This is a study of the forms and institutions of print newspapers books scholarly editions publishing libraries as they relate to and are changed by emergent digital forms and institutions In the early 1990s hypertext was briefly hailed as a liberating writing tool for non linear creation Fast forward no more than a decade and we are reading old books from screens It is however the newspaper for around two hundred years print's most powerful mass vehicle whose economy persuasively shapes its electronic remediation through huge digitization initiatives dominated by a handful of centralizing service providers funded and wrapped round by online advertising The error is to assume a culture of total replacement The Internet is just another information space sharing characteristics that have always defined such spaces wonderfully effective and unstable loaded with valuable resources and misinformation that is both good and bad This is why it is important that writers critics publishers and librarians in modern parlance the knowledge providers be critically engaged in shaping and regulating cyberspace and not merely the passive instruments or unreflecting users of the digital tools in our hands
