The Routledge Handbook of the Global 1980s Jonathan Davis, 2025-08-18 The 1980s was a decade of enormous global change Upheaval from the top of governments to the bottom of societies saw a new world order begin to emerge A new form of capitalism redefined global economics on both the right and left as market forces were unleashed The ideological conflict of the previous four decades petered out as superpower relations improved A more interconnected world introduced new consumer products and forms of popular culture to societies across the globe And protest movements saw new battles fought and new alliances forged in an increasingly interdependent world The Routledge Handbook of the Global 1980s brings together specialists from across the world to examine how the decade was shaped by these changes to politics

economics culture societies and protest movements The Handbook is divided into five parts focusing on the global environment globalisation and neoliberalism politics and society culture and society and the closing stages of the global Cold War By taking an international approach to the history of the 1980s this book offers a wide ranging and important new perspective of this hugely transformative decade It will appeal to students and scholars alike as well as all those interested in the political social economic and cultural shifts of the 1980s

Power Of Speech James Curran,2014-07-18 The subjects of this book are five fascinating prime ministers Gough Whitlam Malcolm Fraser Bob Hawke Paul Keating and John Howard and how they view Australia Until the 1960s our nation believed itself to be British Then during a decade of momentous change this concept of our national identity collapsed It was buried by the forces of cultural and political renewal by disturbing and exciting developments in Asia and by a dawning recognition that the global era of colonial power was over The result was a crisis of national meaning reflected in public debates about multiculturalism Australia's relationships with its Asian neighbours the dispossession of indigenous Australians and the nation's involvement in war In recent years our political leaders have played a conspicuous role in the controversy In *The Power of Speech* James Curran explores the end of the idea of British Australia and how successive prime ministers have attempted to assert personal and often competing visions of Australian nationalism in its place This highly original study of prime ministerial rhetoric exposes the sources of our most powerful leaders' beliefs about Australia

Making Public Policy Decisions Damon Alexander, Jenny M. Lewis, 2014-12-05 To understand public policy decisions it is imperative to understand the capacities of the individual actors who are making them how they think and feel about their role and what drives and motivates them However the current literature takes little account of this preferring instead to frame the decisions as the outcomes of a rational search for value maximising alternatives or the result of systematic and well ordered institutional and organisational processes Yet understanding how personal and emotional factors interact with broader institutional and organisational influences to shape the deliberations and behaviour of politicians and bureaucrats is paramount if we are to construct a more useful nuanced and dynamic picture of government decision making This book draws on a variety of approaches to examine individuals working in contemporary government from freshly trained policy officers to former cabinet ministers and prime ministers It provides important new insights into how those in government navigate their way through complex issues and decisions based on developed expertise that fuses formal rational techniques with other learned behaviours memories emotions and practiced forms of judgment at an individual level This innovative collection from leading academics across Australia Europe the United Kingdom and North America will be of great interest to researchers educators advanced students and practitioners working in the fields of political science public management and administration and public policy

Changing Fortunes Paul Tilley, 2019-08-06 Treasury has been at the centre of every major economic policy issue the Australian Government has faced its role evolving from the government's bookkeeper at Federation in 1901 to the economic policy advising agency it is today Throughout its history Treasury has been a robust and stable institution with a consistent market oriented economic framework but its policy influence has waxed and waned It has supported reformist Treasurers such as Keating and Costello and been a voice of caution when political imperatives have pushed governments down economically damaging paths At times though Treasury advice has been ignored and it has been pushed out into the cold Amidst the political chaos of recent times Treasury has been dragged closer to government and become a less effective policy adviser The consequent lack of a consistent government economic reform narrative over the last decade is plain for all to see *Changing Fortunes* tracks Treasury's history since Federation with a focus on the modern era since its 1976 split with Finance

Winning the Peace Andrew Carr, 2015-01-05 Winning the Peace seeks to explore and explain how Australian governments during the modern period of Australia's engagement with Asia from 1983 till today have attempted to use their defence and foreign policies to shape the region While there were certainly times of tension during this period such as the spikes around the end of the Cold War and during the early years of the War on Terror the region has been largely defined by peace Because of this peace and thanks to Australia's relative size as a middle power the government's attempt to change how other states act and think was not sought through the deployment or use of force but through military and diplomatic engagement and persuasion Australia's smaller size also meant it had to be strategic in its efforts It had to determine which changes were priorities it had to reorganise and develop its resources it had to deploy them effectively and efficiently and it had to be able to sustain the effort in the face of competition and rejection This book focuses on the three main campaigns the Australian government has undertaken since the early 1980s to reshape

the Asia Pacific in pursuit of its national interests

Opposition Vanishing Ashley Lavelle, 2017-09-02 This book questions the common understanding of party political behaviour explaining some of the sharp differences in political behaviour through a focused case study drawing systematically on primary and archival research of the Australian Labor Party's political and policy directions during select periods in which it was out of office at the federal level from 1967-72, 1975-83 and 1996-2001. Why is it that some Oppositions contest elections with an extensive array of detailed policies many of which contrast with the approach of the government at the time while others can be widely criticised as policy lazy and opportunistic seemingly capitulating to the government of the day? Why do some Oppositions lurch to the right while others veer leftward? Each of these periods was in its own way crucial in the party's history and each raises important questions about Opposition behaviour. The book examines the factors that shaped the overall direction in which the party moved during its time in Opposition including whether it was oriented towards emphasising programmes traditionally associated with social democrats such as pensions, unemployment support and investment in public health, education, infrastructure and publicly owned enterprises as well as policies aimed at reducing the exploitation of workers. In each period of Opposition examined an argument is made as to why Labor moved in a particular direction and how this period compared to the other periods surveyed. The book rounds off with analysis of the generalisability of the conclusions drawn: how relevant are they for understanding the behaviour of other parties elsewhere in the world? Where are social democratic parties such as the ALP heading? Is Opposition an institution in decline in the Western world?
