**ENDORSEMENTS** Near a century ago Alfred North Whitehead a philosopher sensitive to the natural vitality of human intelligence warned against the restriction of awareness by products of logical discernment This book makes a bold and much needed effort to recover an appreciation of the creative agency in music of all kinds which supports mastery of all domains of cultural intelligence including language and artificial intelligence We need to replace a rational psychology of musical form with appreciation of impulses of musicality in the life of every human society From birth and before a human mind is eager to share the rhythms and tones of awareness with feeling in body movement elaborated in song instrumental performance or dance The scholastic disciplines of psychology anthropology musicology and ethnomusicology separated by artificial conventions need to recover this common ground by a project that aims at assembling disciplines that have been separated and developed individually for almost hundred years to achieve a better understanding of the cultural psychology of musical experience This collection of papers boldly meets this challenge with skillful respect for the complicated history of our understanding Colwyn Trevarthen Professor Emeritus of Child Psychology and Psychobiology School of Philosophy Psychology and Language Sciences The University of Edinburgh This book is an important marker in the next wave of interdisciplinary socio musical study Culture individual experience and social forces

Merriam, Valerie Merriam, 1964-12-01 In this highly praised and seminal work Alan Merriam demonstrates that music is a social behavior one worthy and available to study through the methods of anthropology In it he convincingly argues that ethnomusicology by definition cannot separate the sound analysis of music from its cultural context of people thinking acting and creating The study begins with a review of the various approaches in ethnomusicology He then suggests a useful and simple research model ideas about music lead to behavior related to music and this behavior results in musical sound He explains many aspects and outcomes of this model and the methods and techniques he suggests are useful to anyone doing field work Further chapters provide a cross cultural round up of concepts about music physical and verbal behavior related to music the role of the musician and the learning and composing of music The Anthropology of Music illuminates much of interest to musicologists but to social scientists in general as well **THE USE OF CREATIVE THERAPIES IN TREATING DEPRESSION** Stephanie L.
