language as verbal gifting unites other orientation with reason to liberate us from biopathic patriarchal conceptions of humanity Sketched against this background Vaughan introduces a conception of monetized exchange as a gift denying and expropriating psychological mechanism which is an unintended collective by product of verbal communication This view stands as a warning against visions of the future in which the institutions of money and the market can be fixed to be more caring and sanitized business as usual can halt the destruction of Mother Earth Rather a gift economy which takes as its model the mother child interaction the gifting in language and the gifting in mother centered societies provides hope for a positive future
