Sky Mystery Magic And Myth:

The Sky Jean-Pierre Verdet,1992 **The Amateur Astronomer's Introduction to the Celestial Sphere** William Millar,William Charles Millar,2006-06-08 Introduction to the night sky and the principles of naked eye astronomy using only elementary mathematics **Dictionary of Nature Myths** Tamra Andrews,2000 Comprehensive and cross referenced this informative volume is a rich introduction to the world of nature as experienced by ancient peoples around the globe 51 halftones **Astronomy Across Cultures** Helaine Selin,2012-12-06 Astronomy Across Cultures A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups **A Skywatcher's Year** Jeff Kanipe,1999-07-08 Have you ever wondered what that bright point of light twinkling near the horizon is or just when you can expect to see the best shooting stars of the year A Skywatcher s Year has answers to these and other questions about what is visible in the night sky throughout the year Through 52 articles arranged week by week A Skywatcher s Year guides you to celestial events and phenomena that occur or are visible with the naked eye and binoculars for each week of the year It acquaints you not only with up to date astronomical information on stars nebulae meteors the Milky Way and galaxies but also conveys the beauty and wonder of the night sky Covering both the Northern Hemisphere and Southern Hemisphere A Skywatcher s Year helps readers find prominent stars and constellations bright star clusters nebulae and galaxies and explains how and when to observe prominent annual meteor showers **The Moon and the Western Imagination** Scott L. Montgomery,2022-03-29 The Moon is at once a face with a thousand expressions and the archetypal planet Throughout history it has been gazed upon by people of every culture in every walk of life From early perceptions of the Moon as an abode of divine forces humanity has in turn accepted the mathematized Moon of the Greeks the naturalistic lunar portrait of Jan van Eyck and the telescopic view of Galileo Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages revealing the faces it has presented to philosophers writers artists and scientists for nearly three millennia To do this he has drawn on a wide array of sources that illustrate mankind s changing concept of the nature and significance of heavenly bodies from classical antiquity to the dawn of modern science Montgomery especially focuses on the seventeenth century when the Moon was first mapped and its features named From literary explorations such as Francis Godwin s Man in the

Moone and Cyrano de Bergerac's *L'autre monde* to Michael Van Langren's textual lunar map and Giambattista Riccioli's *Almagestum novum* he shows how Renaissance man was moved by the lunar orb how he battled to claim its surface and how he in turn elevated the Moon to a new level in human awareness The effect on human imagination has been cumulative our idea of the Moon and therefore the planets is multilayered and complex having been enriched by associations played out in increasingly complicated harmonies over time We have shifted the way we think about the lunar face from a perfect body to an earthlike one with corresponding changes in verbal and visual expression Ultimately Montgomery suggests our concept of the Moon has never wandered too far from the world we know best the Earth itself And when we finally establish lunar bases and take up some form of residence on the Moon's surface we will not be conquering a New World fresh and mostly unknown but a much older one ripe with history *Environment, Space, Place - Volume 2, Issue 1 (Spring 2010)* Gary

Backhaus,2010-01-01 **Women Who Fly** Serinity Young,2018-01-02 Flying women are a common motif in the world's myths and religions Not necessarily winged these women elicit reactions of fear fascination and ambivalence and in so doing reveal much about the perceptions of female power and sexuality through the ages The first book to systematically chronicle the figure of the flying woman in myth literature and art *Women Who Fly* sheds new light on the ways in which women have both influenced and been understood by society and religious traditions around the world *Sun Moon Earth* Tyler

Nordgren,2016-09-13 With beautiful illustrations and a detailed map *Sun Moon Earth* has everything you need to get ready for the next solar eclipse On April 8 2024 millions of Americans will experience an awe inspiring phenomenon a total eclipse of the sun In *Sun Moon Earth* astronomer Tyler Nordgren illustrates how this most seemingly unnatural of natural phenomena was transformed from a fearsome omen to a tourist attraction From the astrologers of ancient China and Babylon to the high priests of the Maya *Sun Moon Earth* takes us around the world to show how different cultures interpreted these dramatic events Greek philosophers discovered eclipses cause and used them to measure their world and the cosmos beyond Victorian era scientists mounted eclipse expeditions during the age of globe spanning empires And modern day physicists continue to use eclipses to confirm Einstein's theory of relativity Beautifully illustrated and lyrically written *Sun Moon Earth* is the ideal guide for all eclipse watchers and star gazers alike **Archetypes and Motifs in Folklore and Literature: A**
