crewmembers fate and that of the human race In this novel the intent is to show real psychological issues that could affect a crew returning from a long duration mission to Mars The storyline presents a mystery that keeps the reader guessing yet the issues at stake are based on the findings from the author's research and other space related work over the past 40 years. The novel touches on actual plans being discussed for such an expedition as well as notions involving the search for Martian life and panspermia The underlying science in particular the psychological psychiatric and interpersonal elements are introduced and discussed by the author in an extensive appendix Nick Kanas is an Emeritus Professor of Psychiatry at the University of California San Francisco where he directed the group therapy training program For over 20 years he conducted research on group therapy and for nearly 20 years after that he was the Principal Investigator of NASA funded research on astronauts and cosmonauts He is the co author of Space Psychology and Psychiatry which won the 2004 International Academy of Astronautics Life Science Book Award and the author of Humans in Space The Psychological Hurdles which won the 2016 International Academy of Astronautics Life Science Book Award Dr Kanas has presented talks on space psychology and on celestial mapping at several regional and Worldcon science fiction conventions A Fellow of the Royal Astronomical Society London he has been an amateur astronomer for over 50 years and is an avid reader of science fiction. States in this space station race Their efforts sometimes resulting in terrifying near death exploits not only put them far ahead of NASA it also served to reshape their own society helping to change it from a communist dictatorship to a freer and more capitalist society At the same time the American space program at NASA was also evolving but not for the better In fact in many ways the two programs and nations were slowly but inexorably trading places Drawing on his vast store of knowledge about space travel and modern history as well as hundreds of interviews with cosmonauts astronauts and scientists Zimmerman has superbly captured the exciting story of space travel in the last half of the twentieth century Leaving Earth tells that story and is required reading for space and history enthusiasts alike who wish to understand the context of the space exploration renaissance taking place now in the twenty first century **Space Stations** Ernst Messerschmid, Reinhold Bertrand, 2013-06-29 Construction has begun on the International Space Station ISS the largest and most complex extraterrestrial construction project ever This book on space stations and the ISS in particular describes component technologies systems integration and the potential utilization of these stations Co authored by Messerschmid one of the first German astronauts it addresses students and engineers in space technology but will interest astronomy and space enthusiasts as well Area 51 Nick Redfern, 2019-01-01 A revealing look at the secrets behind the most controversial U S Air Force base It s no secret that roughly 100 miles north northwest of Las Vegas in the middle of a remote dessert sits an extension of the Edwards Air Force facility commonly known as Area 51 but its clandestine purpose and operations remain shrouded in secrecy It's a highly classified restricted area but cloaked in conspiracy theories its history and true function remain a mystery Is it only devoted to flight testing experimental aircraft and building black ops weapons systems as some contend Or is it home to a dead alien crashed UFOs and extraterrestrial technology Or all of the above Taking a thorough review of the historical record eyewitness accounts whistleblower testimony and deathbed confessions Area 51 The Revealing Truth of UFOs Secret Aircraft Cover Ups and Conspiracies peers behind the classified secrets to understand the nature history and scope of the most controversial base in the United States Redfern investigates the Cold War years U 2 spy plane SR 71 Blackbird and chemical and nuclear weapon research as well as the base s link to an extraterrestrial presence on Earth reports of alien autopsies recovery of non terrestrial spacecraft and attempts to duplicate the fantastic alien technology From UFOs to secret aircraft and the CIA shadowy government programs and unexplained events surrounding Area 51 are illuminated including The government's Nevada land grab at Paradise Ranch The U 2 the Blackbird and the A 12 tests refinements and flights The Robert Scott Lazar revelations Roswell Incident and Project Mogul The development of black helicopters The Autopsies Bodies Unknown Origin 47 file Intelligence gathering through ESP parapsychological and mind control Secret research on teleportation Vast hollowed out chambers tunnels and hidden underground facilities And much much more Strategic Review ,1974 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States U.
