Alevis in Europe Tözün Issa,2016-07-22 The Alevis are a significant minority in Turkey and now also in the countries of Western Europe Over the past century many of them have migrated from rural enclaves on the Anatolian plateau to the great cities of Istanbul and Ankara and from there to the countries of the European Union This book asks who are they How do they construct their identities now and in the past in Turkey and in Europe A range of scholars writing from sociological historical socio psychological and political perspectives present analysis and research that shows the Alevi communities grouping and regrouping defining and redefining sometimes as an ethnic minority sometimes as religious groups sometimes around a political philosophy contingently responding to circumstances of the Turkish Republic s political position and to the immigration policies of Western Europe Contributors consider Alevi roots and cultural practices in their villages of origin the changes in identity following the migration to the gecekondu shanty towns surrounding the cities of Turkey the changes consequent on their second diaspora to Germany the UK Sweden and other European countries and the implications of European citizenship for their identity This collection offers a new and significant contribution to the study of migration and minorities in the wider European context **Refugee Children In The Uk** Rutter, Jill,2006-06-01 Includes statistical tables and graphs **Citizenship and Intercultural Dialogue** Christine Laton,2018-07-17 In the wake of tragic terrorist attacks in Western Europe so called parallel communities have come under increased scrutiny and pressure to be engaged and integrated in the politics and society of the country of settlement In this context the tools of intercultural dialogue and

citizenship have been proposed to bridge the gap between majority and minority communities Yet how are these concepts understood on the ground This book explores perceptions of citizenship and intercultural dialogue among minority youth in Berlin and London chosen for their contrasting citizenship and immigration policies Germany has a strong ethnic heritage and the presence of a large minority community from Turkey The policies and relationship with the Turkish community have often served to perpetuate cultural and ethnic boundaries their presence overshadowing the numerous other ethnicities living within Germany In the UK the large presence of immigrants of Afro Caribbean and Asian descent often dominates centre stage in a much more territorially defined political context while the needs and demands of smaller communities are not commonly known Nonetheless these smaller communities shape and even offer unique insights into the way that local contexts interact with international and transnational structures It is argued that in both cities minority youths communicated feelings and experiences of marginalization and contestation generally feeling a sense of belonging to their local neighbourhoods but not to broader society The book explores the process of valuisation the idea that a value is put on an immigrant according to their desirability or undesirability based on ethnicity or skills Furthermore it assesses the role of education as a mediator between state and society By arguing that local engagement has international ramifications and highlighting the importance of the role of youth in international politics this book offers a new perspective on International Relations and Diaspora Studies   *Language, Youth and Identity in the 21st Century* Jacomine Nortier,Bente A. Svendsen,2015-03-19 The language of young people is central in sociolinguistic research as it is seen to be innovative and a primary source of knowledge about linguistic change and the role of language This volume brings together a team of leading scholars to explore and compare linguistic practices of young people in multilingual urban spaces with analyses ranging from grammar to ideology It includes fascinating examples from cities in Europe Africa Canada and the US to demonstrate how young people express their identities through language for example in hip hop lyrics and new social media This is the first book to cover the topic from a globally diverse perspective and it investigates how linguistic practices across different communities intersect with age ethnicity gender and class In doing so it shows commonalities and differences in how young people experience act and relate to the contemporary social cultural and linguistic complexity of the twenty first century   *Understanding Contexts Of Business In Western Asia: Land Of Bazaars And High-tech Booms* Leo-paul Dana,Aidin Salamzadeh,Veland Ramadani,Ramo Palalic,2022-05-05 Not one size fits all Yet some books teach business with minimal focus on the context for business In reality firms large and small are highly affected by the context in which they operate yet context is not uniformly conceptualized theorized and operationalized by scholars of business and management While most theories have come from developed countries with bountiful contexts the diverse contexts of Western Asia are little understood Religious factors are profoundly dominant in Western Asia and businesses in this diverse area operate with considerations that are rarely considered in research This book reveals a variety of schools of thought that have molded

several business models and mechanisms which are to some extent different from the context of Western economies *Applied Psycholinguistics and Multilingual Cognition in Human Creativity* Christiansen, Bryan,Turkina, Ekaterina,2018-10-19 Multilingualism is becoming a social phenomenon governed by the needs of globalization and cultural openness Owing to the ease of access to information facilitated by the internet individuals exposure to multiple languages is becoming increasingly frequent thereby promoting a need to acquire successful methods in understanding language Applied Psycholinguistics and Multilingual Cognition in Human Creativity is an essential reference source that discusses the psychological and neurobiological factors that enable humans to acquire use comprehend and produce language as well as its applications in human development the social sciences communication theories and infant development Featuring research on topics such as international business language processing and organizational research this book is ideally designed for linguists psychologists humanities and social sciences researchers managers and graduate level students seeking coverage on language acquisition and communication *Researching Language in Superdiverse Urban Contexts* Clare Mar-Molinero,2020-09-22 This book contributes to understanding research approaches for studying multilingualism in the context of contemporary superdiversity in environments that are being dramatically transformed by transnational migration and movement of peoples It explores language in urban contexts the city as a site for experimentation and creativity in language practices This involves considering theoretical frameworks in which to examine these practices but above all it focuses on how we do or could do research into these language practices and their users What methodologies are we using to understand urban linguistic contexts What do we want to learn The chapters explore complex and challenging situations capturing the evolution of new forms of language practice and changing attitudes to language in the city Negotiating Political Identities Daniel Faas,2016-04-22 Globalization European integration and migration are challenging national identities and changing education across Europe The nation state no longer serves as the sole locus of civic participation and identity formation ceasing to have the influence it once had over the implementation of policies Drawing on rich empirical data from four schools in Germany and Britain this groundbreaking book is the first study of its kind to examine how schools mediate government policies and create distinct educational contexts to shape youth identity negotiation and integration processes Negotiating Political Identities will appeal to educationists sociologists and political scientists whose work concerns issues of migration identity citizenship and ethnicity It will also be an invaluable source of evidence for policymakers and professionals concerned with balancing cultural diversity and social cohesion in such a way as to promote more inclusive citizenship and educational policies in multiethnic multifaith schools Legal Pluralism in Action Latif Tas,2016-04-22 This groundbreaking book contributes to and refocuses public debates about the incorporation of plural approaches into the English legal system The book specifically advances the recent largely theoretical discussions of Sharia legal practice by examining a secular method of dispute resolution as practised by the Kurdish Peace Committee in London

Following migration to the West many Kurds still adhere to traditional values and norms Building on these they have adapted their customary legal practices to create unofficial legal courts and other forms of legal hybridisation These practical solutions to the challenges of a pluralistic life are seen by Kurdish communities in the UK as applicable not only to British and transnational daily life but also as a training ground for institutions in a possible future Kurdish state The study provides a substantive evidence base using extensive ethnographic data about the workings of the Kurdish Peace Committee examining detailed case studies in the context of the customs and practices of the Kurdish community Based on an ethnographic and interdisciplinary approach this book will be of interest to policy makers socio legal professionals students and scholars of legal anthropology ethnic minority law transnationalism diaspora Kurdish Turkish and Middle Eastern studies

   Eco-Translation Michael Cronin,2017-01-06 Ecology has become a central question governing the survival and sustainability of human societies cultures and languages In this timely study Michael Cronin investigates how the perspective of the Anthropocene or the effect of humans on the global environment has profound implications for the way translation is considered in the past present and future Starting with a deep history of translation and ranging from food ecology to inter species translation and green translation technology this thought provoking book offers a challenging and ultimately hopeful perspective on how translation can play a vital role in the future survival of the planet   **Research Anthology on Bilingual and Multilingual Education** Management Association, Information Resources,2021-10-29 Given the boost in global immigration and migration as well as the emphasis on creating inclusive classrooms research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education The benefits of bilingual education are widespread allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life However very few resources are available for the successful practice and implementation of this education into the curriculum with an even greater lack of appropriate cultural representation in the classroom Thus it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves This research anthology features a diverse collection of authors offering valuable global perspectives on multilingual education Covering topics such as gamification learning processes and teaching models this anthology serves as an essential resource for professors teachers pre service teachers faculty of K 12 and higher education government officials policymakers researchers and academicians with an interest in key strategy and understanding of bilingual and multilingual education
