Handbook of Reflection and Reflective Inquiry Nona Lyons,2010-04-07 Philosophers have warned of the perils of a life spent without

reflection but what constitutes reflective inquiry and why it is necessary in our lives can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the *Handbook of Reflection and Reflective Inquiry* presents reflective thought in its most vital aspects not as a fanciful or nostalgic exercise but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention, Thoreau's wide awakeness, an act of consciousness and a process by which people can understand themselves, their work, particularly in the form of life projects, and others. Building on this foundation, the *Handbook* analyzes, through the work of 40 internationally oriented authors, definitional issues concerning reflection, what it is and is not, worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education, reflection as promoted across professional educational domains including K-12 education, teacher education, occupational therapy, and the law, methods of facilitating and scaffolding reflective engagement, current pedagogical and research practices in reflection, approaches to assessing reflective inquiry, educators across the professions as well as adult educators, counselors, and psychologists, and curriculum developers concerned with adult learning. *Will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.*

Bodies as Sites of Cultural Reflection in Early Childhood Education Rachael S. Burke, Judith Duncan, 2014-10-30 Taking the body as a locus for discussion, Rachael S. Burke and Judith Duncan argue not only that implicit cultural practices shape most of the interactions taking place in early childhood curricula and pedagogy but that many of these practices often go unnoticed or unrecognized as being pedagogy. Current scholars inspired by Foucault acknowledge that the body is socially and culturally produced and historically situated; it is simultaneously a part of nature and society as well as a representation of the way that nature and society can be conceived. Every natural symbol originating from the body contains and conveys a social meaning, and every culture selects its own meaning from the myriad of potential body symbolisms. *Bodies as Sites of Cultural Reflection in Early Childhood Education* uses empirical examples from qualitative fieldwork conducted in New Zealand and Japan to explore these theories and discuss the ways in which children's bodies represent a central focus in teachers' pedagogical discussions and create contexts for the embodiment of children's experiences in the early years.

Diverse Early Childhood Education Policies and Practices

Amita Gupta, 2014-04-29 *Diverse Early Childhood Education Policies and Practices* explores issues in early childhood education and teacher preparation in five Asian countries: India, Singapore, China, Sri Lanka, and the Maldives. Some observed classrooms in these countries reflect influences that are simultaneously indigenous and colonial, local and global. By highlighting the diverse and often hybrid classroom pedagogies at work in these 21st century Asian classrooms, the discussions in this book take into consideration the influence of globalization on local policies and practices and the challenge educators face when they are expected to reconcile different and sometimes conflicting cultural and pedagogical world views. Through a research-driven analysis of key issues such as recent revisions to national early childhood education policies, perceptions on play-based and child-centered pedagogy, curriculum and learning materials, and an emphasis on the teaching of values, this book illuminates the diversity of the observed classrooms as well as current trends in early childhood education in parts of Asia. The cross-national perspective serves to expand and diversify the global discourse of early childhood education and teacher education.

Teacher Reflections on Transitioning From K-12 to Higher Education Classrooms Broemmel, Amy D., Vines, Nora, 2022-04-15 Education is a field in which reflective practice is imperative for teacher and student success and for maintaining the desire to remain in the profession. During times of uncertainty, particularly as teachers faced the dual pandemics of social injustice and the COVID-19 pandemic over the past year, they have felt demoralized and powerless. As a result, burnout among educators is becoming increasingly prevalent. It is crucial for teachers to hear reflections of others' experiences to remind them that they are not alone in their work, provide opportunities for them to find connections with fellow educators, and encourage them to engage in reflective practices of their own. *Teacher Reflections on Transitioning From K-12 to Higher Education Classrooms* provides a collection of reflections from educators on their varied experiences within education and how and why they have pursued a place in academia. This book speaks to the humanistic side of academia by acknowledging the multiple passions, professions, and pathways that led each of the authors to academia. It is unique in that it is laced with the lived realities of the human side of academia from a shared stories perspective. Covering topics such as lifelong learners and identity shifts, this major reference work is ideal for academicians, researchers, scholars, practitioners, principals, administrators, educators, and students.
