Horrible Workers Donald A. Nielsen, 2005-01-01 The poet makes himself a seer by a long boundless and systematic derangement of all the senses What if he is destroyed in his flight through things unheard of and unnamed other horrible workers will come they will begin at the horizons where the other has fallen In Arthur Rimbaud's letter to Paul Demyen Rimbaud describes the poet's role as being something like a trickster But the poet's trick or joke is self directed A long dissociation of the senses from reality creates for the poet a new relationship to reality But the poet's work with reality is always something like a play at what is real Play becomes necessary so that the poet doesn't just change his or her relationship to reality but in playing creates a space for poetics a space for work The French poet Arthur Rimbaud American blues musician Robert Johnson German anarchist intellectual Max Stirner and the phenomena of the Manson family circle have all appeared as forms and figures on the invisible horizon described by Rimbaud above Through a reading of Emile Durkheim's *Suicide* Donald Nielsen demonstrates how in each case one can locate hitherto unnoticed similarities in the social experiences of each subject featured in these four cases Nielsen demonstrates how social experience can lead to forms of cultural expression that are contrary to the logic of the originating experience In his discussion of experience and expression Nielsen creates a truly unique text that sheds new light on sociological theory modernism and modernist thought ethics and religious thought and new and burgeoning methodologies in cultural studies Sociologists anthropologists psychologists philosophers of the social sciences and adherents to cultural studies will find much of interest in Nielsen's excellent study

The Sociology of Religion George Lundskow,2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion s practioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow s approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will
