Taming Japan's Deflation Yoshiko Kojo, Gene Park, Saori N. Katada, Giacomo Chiozza,2018-11-15 Bolder economic policy could have addressed the persistent bouts of deflation in post bubble Japan write Gene Park Saori N Katada Giacomo Chiozza and Yoshiko Kojo in Taming Japan s Deflation Despite warnings from economists intense political pressure and well articulated unconventional policy options to address this problem Japan s central bank the Bank of Japan BOJ resisted taking the bold actions that the authors believe would have significantly helped With Prime Minister Abe Shinzo s return to power Japan finally shifted course at the start of 2013 with the launch of Abenomics an economic agenda to reflate the economy and Abe s appointment of new leadership at the BOJ As Taming Japan s Deflation shows the BOJ s resistance to experimenting with bolder policy stemmed from entrenched policy ideas that were hostile to activist monetary policy The authors explain how these policy ideas evolved over the course of the BOJ s long history and gained dominance because of the closed nature of the broader policy network The explanatory power of policy ideas and networks suggests a basic inadequacy in the dominant framework for analysis of the politics of monetary policy derived from the literature on central bank independence This approach privileges the interaction between political principals and their supposed agents central bankers but Taming Japan s Deflation shows clearly that central bankers views shaped by ideas and institutions can be decisive in determining monetary policy Through a combination of institutional analysis quantitative empirical tests in depth case studies and structured comparison of Japan with other countries the authors show that ultimately the decision to adopt aggressive monetary policy depends largely on the bankers established policy ideas and policy network

The Goddess and the Dragon Patrick Hein,2014-10-02 Neoliberal globalization affects the livelihoods and socio economic conditions of people all over the world This is also true for Japan where increased foreign trade and foreign investments have dramatically changed the internal landscape of the country during recent decades There are many social groups for whom globalization has brought positive changes International Japanese companies and their employees for example have benefited from the commercial expansion and rise in trade exchanges How then does globalization influence the subjective experiences and worldviews of ordinary Japanese at the periphery How are local residents outside the centers of affluence affected by the global forces of mass consumerism and cultural diversity The local fisheries community of Katase Enoshima is very close to the megacities of Tokyo and Yokohama and is visited by almost ten million visitors a year This field research study examines how local residents have coped with the risks and opportunities of modern mass tourism both historically and in modern times This book contributes to a better understanding of the dynamics of social transformation processes The findings suggest that mass tourism is a double edged sword on one side residents try to attract consumer tourists in large numbers because they depend economically on them on the other side they maintain strong and exclusive community bonds and self assert their cultural identity of pure Japaneseness through festivals religious zeal and myths In other words they benefit indirectly from globalization but they do not want to be part of it

Postcolonial Disaster Pallavi Rastogi,2020-04-15 Postcolonial Disaster studies literary fiction about crises of epic proportions in contemporary South Asia and Southern Africa the oceanic disaster in Sri Lanka the economic disaster in Zimbabwe the medical disaster in South Africa and Botswana and the geopolitical disaster in India and Pakistan Pallavi Rastogi argues that postcolonial fiction about catastrophe is underpinned by a Disaster Unconscious a buried but mobile agenda that forces disastrous events to narrate themselves She writes that in disaster fiction a literary Story and its real life Event are in constant dialectic tension In recent disasters Story and Event are tied together as the urgency to circulate information and rebuild in the aftermath of the disaster dictates the flow of the narrative As the Story acquires temporal distance from the Event such as the seventy three years since the partition of India in 1947 it plays more with form

and theme to expand beyond a tale about an all consuming tragedy Story and Event are in a constant dance with each other and the Disaster Unconscious plays the tune to which they move Rastogi creates a narratology for postcolonial disaster fiction and brings concepts from Disaster Studies into the realm of literary analysis *The Publishers Weekly* ,2004

emphasizing the importance of self care for the legions of people supporting and taking care of others While there are books that have been written about the challenges to professionals such as social workers nurses and psychologists to becoming burned out Brockman s book is written also for the millions of untrained non professionals who are being recruited daily to care for their elderly parents Do you fit into either of these categories He describes the many influences that lead to compassion fatigue and becoming infected by the feelings of others This is all about how unconscious empathy can take sensitive caregivers down a never ending spiral to adrenal fatigue and depression In Chapter 2 Characteristics of High Intensity Relaters Brockman describes the primary personality of those helpers whose currency is relationship and who easily fall prey to subtle energetic influences that erode their vital force Externally referencing to others needs first tends to be one of their traits Chapter 6 Prevent Self Sabotage is filled with practical ways to stay focused and positive while overcoming old repetitive and negative inner chatter Confronting your tyrannizing inner critic is never easy Brockman tells you how He identifies different types of energy drainers that use our energy to enliven themselves and deplete ours He does a good job explaining how to create secure and persistent energetic boundaries with difficult and demanding people and other disruptive environments This is perhaps the most important theme woven throughout the book for the helper personality tends to not know how to say NO to requests from others Learning how to establish reliable energetic boundaries is incredibly important for protecting against the interpersonal hazard he refers to as psychotoxic contamination that can become cumulative over time and generate serious long term health consequences Dark and heavy energy can settle into and invade the body to wreak havoc with one s health and emotional stability The good news is that you can effectively create these boundaries and more importantly learn how to sustain them amidst the ongoing demands of the people you are helping He spends a chapter on how to use specific energy psychology techniques for emergency self care providing fascinating case examples to illustrate how to prevent post traumatic stress from building up to become PTSD Brockman spends some time explaining the importance of optimizing your self care by managing your chi and how plants the natural world and flower essences can support helpers to maintain their inner balance and overall harmony In Chapter 11 Making It Happen From Within you will discover well described and powerful imagery techniques for manifesting positive self care outcomes for yourself Brockman then teaches you how to connect to and work with your inner guides for reliable personal and professional guidance The power of a caregiver s presence is highlighted in the concluding chapter discussing how being the blessing actually creates collective coherence in the immediate caregiver s environment and thus positively affects those who are being cared for For readers who would like to measure and determine the degree of their own present health and well being there are two self assessment checklists for high intensity relaters in Appendix 2 that can also be downloaded from his website www.DynamicEnergeticHealing.com *Wilding a Tame Heart* , [Empowering Marginal Communities with Information Networking](#) Rahman, Hakikur,2005-11-30 This book details how new technologies can help people living in
