Dewey 1859 1952     **The Rural Modern** Kate Merkel-Hess,2016-08-17 Discussions of China's early twentieth century modernization efforts tend to focus almost exclusively on cities and the changes both cultural and industrial seen there As a result the communist peasant revolution appears as a decisive historical break Kate Merkel Hess corrects that misconception by demonstrating how crucial the countryside was for reformers in China long before the success of the communist revolution In *The Rural Modern* Merkel Hess shows that Chinese reformers and intellectuals created an idea of modernity that was not simply about what was foreign and new as in Shanghai and other cities but instead captured the Chinese people's desire for social and political change rooted in rural traditions and institutions She traces efforts to remake village education economics and politics analyzing how these efforts contributed to a new inclusive vision of rural Chinese life Merkel Hess argues that as China sought to redefine itself such rural reform efforts played a major role and tensions that emerged between rural and urban ways deeply informed social relations government policies and subsequent efforts to create a modern nation during the communist period     [The World's Chinese Students' Journal](#) ,1912     *The Glocalization of Early Childhood Curriculum* Philip Hui Li,Jennifer J. Chen,2023-02-03 With empirical evidence and theoretical critique this book unveils the myths and debates e.g child centeredness versus teacher directedness about early childhood curricula revealing their unique social cultural and historical roots Analyzing globally advocated early childhood curricula and ideologies such as the developmentally appropriate practice the child centered approach constructivism and globalized childhood this book argues that the direct adoption of these contextually bound approaches in local environments may be inappropriate if social and cultural compatibility is lacking The authors then examine how early childhood curricula may be implemented in a hybrid form Featuring case studies from American and Chinese contexts this book offers insights and recommendations for the future development and redeployment of early childhood curriculum studies and practices in a post truth era This volume serves as a valuable resource for scholars and students of early childhood education and comparative education as well as for key education stakeholders     **Teaching Children** Ann El-Moslimany,2018-01-01 The author explores education from the essential principles of Tawhid Oneness of God humanity knowledge fitrah concept of human nature and the role of humans as vicegerents of God on earth responsibility and stewardship The current education system dates back a hundred years or more and is in desperate need of a reboot In developing the industrialized society the education system itself became like a factory the end product being pupils who merely regurgitate facts and themselves end up as cogs in the machine that is the wider industrial complex The legacy of this is a soulless functional educational system that fails to develop pupils to meet the present and future needs of individuals and their expectations This failure inevitably impacts on society and humanity at large Society has long since moved beyond the industrial revolution and into an age of global connectedness where the sum of human knowledge is freely available via the internet It is an age where people are generally more well informed and on a variety of issues An effective holistic educational philosophy is required one that gives

full spiritual meaning to all that a child learns It should equip children with spiritual awareness morals and values social responsibility and accountability self discipline and self determination self confidence and empowerment ambition and aspiration tempered with thoughtfulness and a sense of gratitude **Love and Compassion** John P.
