Target Ploesti View From A Bombsight:

Target Ploesti Leroy W. Newby, 1983 *Die Crivitzer Synagoge*, 2005 *1 August 1943 - Today's Target Is Ploesti: A Departure From Doctrine* Lieutenant Colonel Robert J. Modrovsky, 2014-08-15 The focus of this paper will be on the 1 August 1943 bombing raid on the Ploesti oil field and refineries by an American task force composed of bombardment groups of the Eighth and Ninth Air Forces The Ploesti raid stood apart from the rest of the war in the air The idea for it and the unusual tactics employed came from the top it generated from General Arnold's headquarters and was approved by President Roosevelt Winston Churchill called Ploesti the taproot of German might It was not a part of any particular campaign but was considered vital in itself It was painstakingly planned and executed relatively quickly by the best prepared and most experienced force available at the time It was also fought with unparalleled bravery the sole action of the war for which five Congressional Medals of Honor were awarded The purpose in examining Ploesti is to first gain a complete understanding of the events leading to the planning for the raid the raid itself and finally the impact on the Germans in its aftermath With this established the intent is to assess the raid while keeping one fascinating question in mind after building a doctrine for twenty years based on high altitude daylight precision bombing why in its first major bombing effort did the United States depart from doctrine and conduct a low level bombing mission on Ploesti the only low level bombing mission conducted in the war

Target Ploesti, 1986-06-01 Strategic air warfare : an interview with generals..., **Flying against Fate** S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in *Flying against Fate* a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers' superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers *Flying against Fate* expands our understanding of a major aspect of the psychology of war
