Regulation of red cell life-span, erythropoiesis, senescence and clearance Lars Kaestner, Anna Bogdanova, 2014-12-03 Human red blood cells are formed mainly in the bone marrow and are believed to have an average life span of approximately 120 days However is it true for all red blood cells What are the changes associated with red cell maturation adulthood and senescence What are the determinants of red cell life span and clearance What are the mechanisms in control of red cell mass in healthy humans and patients with various forms of anemia What are the markers of circulating red cell senescence and in cells during storage and transfusion Within the life span may properties of red cells change leading to age mixed circulating cell populations Although these cells appear to be genetically terminated by the time they are released into the blood stream they undergo surprisingly versatile modifications depending on the life style and health conditions of a human host Numerous disorders are believed to be associated with facilitated ageing of red blood cells In vitro ageing and damage of red blood cells during storage is yet one more important issue related

to the risks and efficiency of blood transfusion Many of the mechanisms behind such effects are far from being fully understood In this context the Research Topic is set to include articles in the field of biochemical investigations biophysical approaches physiological and clinical studies related to red blood cell maturation and aging This includes Original Research Methods Hypothesis and Theory Reviews and Perspectives Modern Hematology Reinhold Munker, Erhard Hiller, Ronald Paquette, 1999-12-03 In Modern Hematology Biology and Clinical Management Reinhold Munker and his distinguished colleagues offer a concise up to date summary of the fundamentals of clinical hematology including all the most recent developments Their comprehensive survey presents the essential clinical facts concerning malignant and nonmalignant blood diseases detailing diagnostic methods angiostatic drugs the very latest therapies e g stem cell transplantation classifications scientific controversies and clear treatment recommendations They also illuminate the scientific basis needed to understand the new diagnostic and treatment methodologies the molecular pathogenesis of many hematologic disorders and the new cellular therapies for these malignant disorders All major blood diseases are covered as well as the rarer disorders of special scientific interest Modern Hematology Biology and Clinical Management strikes an authoritative balance between clinical acumen and fundamental understanding By concisely combining cutting edge explanations of disease pathophysiology with practical approaches to the diagnosis and management of hematologic disorders it provides an invaluable vade mecum for today's physicians and students needing to keep up with the latest clinical and scientific developments **Hematology and Coagulation** Amer Wahed, Andres Quesada, Amitava Dasgupta, 2019-09-06 Hematology and Coagulation A Comprehensive Review for Board Preparation Certification and Clinical Practice Second Edition takes a practical and easy to read approach to understanding hematology and coagulation at an appropriate level for both board preparation and refresher courses The book bridges the gap between large textbooks and medical technology books written for laboratory technicians providing the sufficient background in genetics toxicology and immunology that residents and medical students need to know in order to become successful physicians Readers will use this quick reference to understand how tests are performed and how to interpret results This clear and easy to read presentation of core topics and detailed case studies illustrates the application of hematopathology on patient care Provides a newly updated source that is in accordance with World Health Organization guidelines on the diagnosis of hematological malignancies Succinctly covers all important clinical information found in larger textbooks in an easy to understand manner Highlights essential concepts in hematopathology in such a way that pathology fellows and clinicians can understand methods without being specialists in the field Current Bibliography of Epidemiology, 1971 Monthly with annual cumulations Comprehensive current index to periodical medical literature intended for use of practitioners investigators and other workers in community medicine who are concerned with the etiology prevention and control of disease Citations are derived from MEDLARS tapes for Index Medicus of corresponding date Arrangement by 2 sections i e Selected subject headings and Diseases organisms vaccines No author index **Nathan and**
