

THE HERPETOLOGICAL CONTRIBUTIONS OF WILHELM C. H. PETERS (1814-1898). With an Introduction, Annotated Bibliography, and Memoirs of Peter, 1988. Aaron M. Bauer, Robert Goodrich, and Margaret Midgett. Society for the Study of Amphibians and Reptiles in cooperation with Deutsche Gesellschaft für Herpetologie und Terrarienkunde. 714 p. \$75.00 (hardcover).—The well-known 1978 monograph *Gedenkskrift herpetologisch* covering many other (in some) Wilhelms' Papers has as much the name of herpetological papers, nearly all of which were written in German and most (about 90%) of them published in several Berlin journals that are hard to get in many places nowadays. The authors of the present compilation of all of Peters' herpetological papers have done a tremendous job in getting all the publications together and, in doing so, did a great service to herpetology. There is no need to go through extensive inquiries to libraries and search engines to locate a certain paper and actually get it (or an expensive Xerox copy of it) in print form. The book is divided into two parts, the first of which consists of the original contribution by the authors with an Introduction, a short review of a Bibliography of Wilhelm C. H. Peters, an Annotated Bibliographical Bibliography of W. C. H. Peters, a Synopsis of Herpetological Data described by W. C. H. Peters, two chapters of the mentioned and described by other authors in papers authored by Peters, and a paper presented by Peters and a section on Literature cited in the foregoing chapters, not including any Peters' references. This part occupies 87 pages. The second part consists of facsimile reprints of all of Peters' herpetological papers. All papers have been reproduced in such a way that the original pages fit on one page of the reprint. There is only one exception to the rule and that is the book *Reptilien Abrechnungen* which was restricted to 42 pages in 1868, with the text in its original size, but with the plates reduced to a size of 1/4 the dimensions of the plates. Although the plates and figures in the book were sparsely colored, the plates are reproduced here in black and white, while sometimes (p. 11, fig. 4, pl. 147, fig. 2, pl. 14, fig. 26) leads to confusion results out in some other sources (e.g., p. 5) leads to a "lost" track than the color original.

The biography of Peters seems to have been done in a thoroughly and quite honestly manner on the first trip to Bonn-Bonn between 1842 and 1848. Many details are given of the places where he stayed and the periods he spent there, based on Peters' journal of the trip. The major locality "Bonn" has numerous citations,

but the authors provide some evidence that it is likely to be the place in Bonn. If not the trip, Peters published some smaller papers describing new species (mostly frogs and tadpoles) described in the field by Peters. Some of these were published when Peters still was in Bonn-Bonn. In this connection, it might be worth while to mention that some of Peters' papers were written while two weeks of being present in Bonn. Thus in all modern lists of publications, modernity and dating are being increasing at the time, when, and where have these papers published in a certain journal, in such a short time? Maybe we can look something from our scientific sources.

During his stay in Bonn-Bonn, Peters collected 478 reptiles and amphibians but also (many?) specimens of other groups. Nevertheless, for protodermis standards, it seems to be a very low number considering the amount of time spent in the field. The explanation, probably is that Peters did not pay special attention to reptiles and amphibians and only picked them up when they came his way early. Notwithstanding this small collection, containing 146 species, descriptions of eight new genera, 55 new species and one new subgenus were based on it.

After his return to Berlin, Peters stayed working in the Anatomical Institute, and in 1868 he started his career as the Zoological Museum. After about a year, he had already become director of the museum, a position he kept till his death in 1898. During the period between 1868 and 1898, he published many papers dealing with reptiles and amphibians from all over the world. According to the authors, Peters maintained correspondence and traded and traded specimens, exchanges with herpetologists throughout Europe, and they collected a lot of them. The is they provide details is not complete. One of Peters' long-term correspondents and only nine years his senior was the great Schlegel in Germany who had been working in the *Staatssammlung von Naturhistoria*. He was in 1868, after 1865, first as a herpetologist and later as an ornithologist and malacologist. In 1868, he became director of the museum in London until his death in 1894. In the archives of the *Staatssammlung von Naturhistoria*, now named *Naturhistorisches Museum*, there are a number of handwritten letters from Peters to Schlegel and the greater part of the letters and a number of his writing to the latter, a short regular exchange of letters, with place names Berlin and London. This is also evident from some descriptions of Peters, which he attributed to Schlegel (e.g., *Appendix*
