**The Hidden Epidemic** Institute of Medicine, Committee on Prevention and Control of Sexually Transmitted Diseases, 1997-03-28 The United States has the dubious distinction of leading the industrialized world in overall rates of sexually transmitted diseases STDs with 12 million new cases annually About 3 million teenagers contract an STD each year and many will have long term health problems as a result Women and adolescents are particularly vulnerable to these diseases and their health consequences In addition STDs increase the risk of HIV transmission The Hidden Epidemic examines the scope of sexually transmitted infections in the United States and provides a critical assessment of the nation's response to this public health crisis The book identifies the components of an effective national STD prevention and control strategy and provides direction for an appropriate response to the epidemic Recommendations for improving public awareness and education reaching women and adolescents integrating public health programs training health care professionals modifying messages from the mass media and supporting future research are included The book documents the epidemiological dimensions and the economic and social costs of STDs describing them as a secret epidemic with tremendous consequences The committee frankly discusses the confusing and often hypocritical nature of how Americans deal with issues regarding sexuality the conflicting messages conveyed in the mass media the reluctance to promote condom use the controversy over sex education for teenagers and the issue of personal blame The Hidden Epidemic identifies key elements of effective culturally appropriate programs to promote healthy behavior by adolescents and adults It examines the problem of fragmentation in STD services and provides examples of communities that have formed partnerships between stakeholders to develop integrated approaches The committee's recommendations provide a practical foundation on which to build an integrated national program to help young people and adults develop habits of healthy sexuality The Hidden Epidemic was written for both health care professionals and people without a medical background and will be indispensable to anyone concerned about preventing and controlling STDs

Sexually Transmitted Disease Surveillance, 2009 Our Common Journey National Research Council, Policy and Global Affairs, Policy Division, Board on Sustainable Development, 1999-12-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet's environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive
