Weil,1994 *The Hidden Places of World War II* Jerome M. O'Connor,2022-02-15 In *The Hidden Places of WWII* the author takes readers to overlooked places where WWII history was made These are sites that were thought to be closed or locked away forever or in some cases thought never to exist at all or were ignored by military historians for decades With historical photos contemporary photos and written in a conversational style the book opens the eyes of a new generation of readers as well as an older generation and takes them to the actual locations that changed history Many military history readers don't know that you can still visit Nazi U boat pens in Lorient and La Rochelle on the French Atlantic coast they were used in the filming of *Raiders of the Lost Ark* and even pieces of the Atlantic Wall Hitler had built along the French coast in 43 and 44 to thwart the invasion he knew was coming These are only two of the many hidden places the author introduces the reader to

The Secret State Richard C. Thurlow,1995-01-09 This is a history of the secret activities of the British government in response to threats to the nation's well being and stability during the twentieth century It is based on intensive and widespread research in private and public archives and on documents many of which have only recently come to light or been made available The dangers perceived by the state have been manifold and various coming from within and from abroad Anarchists fascists socialists communists the IRA trades unionists and animal activists as well as spies terrorists and saboteurs have been the subject of undercover investigation along with almost every large scale movement from suffragettes to campaigners for peace and nuclear disarmament The author describes the methods and people employed and the mixed nature of their results The British state has always seen itself as civil and liberal but as Dr Thurlow shows it has sometimes been far from open The government has had many weapons at its disposal from public order acts censorship internment and proscription on the one hand to covert operations infiltration and manipulation on the other Yet when examined in the light

of new evidence the activities of the state are fully comprehensible only in terms of those who comprised it The author shows the tensions among the departments between MI5 MI6 SIS and the Special Branch for example and the crucial part played by individuals whose motives were often far from what the government supposed them to be This is an at times disturbing at others almost comical but always fascinating account It throws light on the inmost workings of the state as well as on the movements and people subject to investigation and action

Secret Lives of Carnivorous Marsupials Andrew Baker,Chris Dickman,2018-08-01 Most living carnivorous marsupials lead a secretive and solitary existence From tiny insect eaters to the formidable Tasmanian Devil *Secret Lives of Carnivorous Marsupials* offers rare insight into the history and habits of these creatures from their discovery by intrepid explorers and scientists to their unique life cycles and incredible ways of hunting prey *Secret Lives of*

Carnivorous Marsupials provides a guide to the world's 136 living species of carnivorous marsupials and is packed with never before seen photos. Biogeography, relationships, and conservation are also covered in detail. Readers are taken on a journey through remote Australia, the Americas, and dark, mysterious New Guinea, some of the last truly wild places on Earth. The book describes frenzied mating sessions, minuscule mammals that catch prey far larger than themselves, and extinct predators including marsupial lions, wolves, and even sabre-toothed kangaroos. **Journal**, 1895 *Landscapes and Learning*, 2009-01-01. Places are made after their stories. Just as place names describe complex and conflicted place-making aspirations, so with all marks associated with the marking of places, tracks the symbolic representation of these in song, dance, and poetic speech. Indeed, all the technologies that join up distances into narratives; they all inscribe the earth's surface with the forms of stories. Of course, these are not the same as the foundational myths of imperial cultures whose aim is to displace any prior discourse of place-making. They are stories of and as journeys, passages in a double sense: constitutionally incomplete because they always await their completion in the act of crossing over or meeting, which of course is endless. Paul Carter, *Landscapes and Learning* maps some of these stories and passageways to open up new place-making possibilities. The book uses the lens of place to explore how we can respond differently to some of the major questions of our time. Postcolonial global concerns such as increased displacement and migration, the loss of indigenous knowledges, and the imperatives of environmental degradation and climate change require critical educational responses. Place studies provides new languages and fresh metaphors to open up interdisciplinary conversations in the space between local and global and indigenous and non-indigenous knowledges. Through its focus on the mutual constitution of bodies, identities, histories, spaces, and places, place studies offers a conceptual tool for important cultural and environmental transformations.
