Carpenter, 1997 A selective list of publications for the period offering some 25 200 entries no annotations arranged by nationality and linguistic groups Most entries concern literary currents in drama since the last third of the 19th century playwrights who lived at least part of their lives in the 20th century noted directors and performance theory For students and scholars of modern dramatic literature While annual supplements of recent publications appear in the journal Modern Drama new compilers took a publication date of 1991 as

their starting point for listings leaving some 2 000 items collected after 1992 appearing only in this volume Annotation

 and Film Katja Krebs,2013-08-15 This book provides a pioneering and provocative exploration of the rich synergies between
 adaptation studies and translation studies and is the first genuine attempt to discuss the rather loose usage of the concepts
 of translation and adaptation in terms of theatre and film At the heart of this collection is the proposition that translation
 studies and adaptation studies have much to offer each other in practical and theoretical terms and can no longer exist
 independently from one another As a result it generates productive ideas within the contact zone between these two fields of
 study both through new theoretical paradigms and detailed case studies Such closely intertwined areas as translation and
 adaptation need to encounter each other s methodologies and perspectives in order to develop ever more rigorous
 approaches to the study of adaptation and translation phenomena challenging current assumptions and prejudices in terms of
 both The book includes contributions as diverse yet interrelated as Bakhtin s notion of translation and adaptation Bollywood
 adaptations of Shakespeare s Othello and an analysis of performance practice itself arguably an adaptive practice which uses
 a variety of languages from English and Greek to British and International Sign Language As translation and adaptation
 practices are an integral part of global cultural and political activities and agendas it is ever more important to study such
 occurrences of rewriting and reshaping By exploring and investigating interdisciplinary and cross cultural perspectives and
 approaches this volume investigates the impact such occurrences of rewriting have on the constructions and experiences of
 cultures while at the same time developing a rigorous methodological framework which will form the basis of future
 scholarship on performance and film translation and adaptation **Drama** ,1983 Teleliteracy David Bianculli,2000-07-01

A Peripheral Weapon? David J. Childs, 1999-09-30 The tank was arguably the most important technological innovation that developed during World War I however without the support of the British Army and the allocation of important wartime resources it would have remained merely a peripheral weapon For far too long the depiction of the British War Office and GHQ France as anti technological and cavalry oriented has persisted While some historians have recently challenged this view much of the traditional versus progressive school of thought in regard to the production and employment of the tank still survives By posing the question was the tank a peripheral weapon this work reveals the vital role of the War Office in the production and employment of this stunning new weapon The War Office was behind the creation of the original Tank Committee the New or Advisory Tank Committee the Tank Directorate and the Tank Board It was these bodies particularly the Tank Board established in 1918 that facilitated the crucially important liaison between the users of tanks in France and the producers at the Ministry of Munitions Without War Office involvement in this way without its continued orders for more and better tanks and without the consistently high priority status accorded to tank production by General Haig it is inconceivable that the tank would have reached the level of technical sophistication and therefore usefulness that it had by late 1918
