

The background of the entire image is a dark charcoal grey. It is covered with numerous thick, expressive, red scribbles and loops, resembling chalk or paint strokes. These marks are scattered across the frame, creating a sense of movement and spontaneity. In the center of the image, there is a white, equilateral triangle. The triangle is oriented with one vertex pointing downwards. It is a simple, clean geometric shape that contrasts sharply with the chaotic, organic red marks around it.

The Hidden Factor:

The Hidden Factor Steven Skaggs, 2023-11-21 An exquisitely illustrated introduction to the gestural mark in the designed world exploring the tension between marks which are felt and images and words which are conceptual In *The Hidden Factor* Steven Skaggs provides a beautifully illustrated and explained introduction to the mark from those as physical as a scratch made by an animal to those as accidental as a splatter of paint to those as intentional as hand drawn characters Skaggs makes the case that in the visual arts gestures and mark making operate on an equal level with image and word While we might think of content as that which is communicated through text and images Skaggs shows through visual examples that the gestural mark is often hidden within both images and the typographic forms that convey words By mapping different kinds of marks and showing how marks combine with image and word *The Hidden Factor* explains that our desire for conceptual information suppresses our awareness of marking This is especially the case with the tension between word and mark where we desire legibility As a result one of the most conservative of arts calligraphy has the potential of being the most radical since gesturally expressive handwriting is a natural threat to the legibility of a text Filled with expressive calligraphic art graffiti and other gorgeous marks *The Hidden Factor* is an eye opening read that brings to the fore the importance and indeed the prevalence of the mark in everything we see
