Outing and the Wheelman, 1901 Ecology of Fear Mike Davis, 2014-01-14 Rich with detail bold and original Mike Davis
s Ecology of Fear is a gripping reconnaissance into the urban future an essential portrait of America at the millennium Los Angeles has become a magnet for the American apocalyptic imagination Riot fire flood earthquake only locusts are missing from the almost biblical list of disasters that have struck the city in the 1990s From Ventura to Laguna more than one million Southern Californians have been directly touched by disaster related death injury or damage to their homes and businesses Middle class apprehensions about angry underclasses are exceeded only by anxieties about blind thrust faults underlying downtown L A or about the firestorms that periodically incinerate Malibu And the force of real catastrophe has been redoubled by the obsessive fictional destruction of Los Angeles by aliens comets and twisters in scores of novels and films The former Land of Sunshine is now seen by much of the world including many of L A s increasingly nervous residents as a veritable Book of the Apocalypse theme park In this extraordinary book Mike Davis the author of City of Quartz and our most fascinating interpreter of the American metropolis unravels the secret political history of disaster real and imaginary in Southern California As he surveys the earthquakes of Santa Monica the burning of Koreatown the invasion of man eating mountain lions the movie Volcano and even Los Angeles s underrated tornado problem he exposes the deep complicity between social injustice and perceptions of natural disorder Arguing that paranoia about nature obscures the fact that Los Angeles has deliberately put itself in harm s way Davis reveals how market driven urbanization has for generations transgressed against environmental common sense And he shows that the floods fires and earthquakes reaped by the city were tragedies as avoidable and unnatural as the beating of Rodney King and the ensuing explosion in the streets

H. Hinsley,Francis Harry Hinsley,1967-10 In the last years of the nineteenth century peace proposals were first stimulated by fear of the danger of war rather than in consequence of its outbreak In this study of the nature and history of international relations Mr Hinsley presents his conclusions about the causes of war and the development of men s efforts to avoid it In the first part he examines international theories from the end of the middle ages to the establishment of the League of Nations in their historical setting This enables him to show how far modern peace proposals are merely copies or elaborations of earlier schemes He believes there has been a marked reluctance to test these theories not only against the formidable criticisms of men like Rousseau Kant and Bentham but also against what we have learned about the nature of international relations and the history of the practice of states This leads him to the second part of his study an analysis of the origins of the modern states system and of its evolution between the eighteenth century and the First World War
