Müller-Enbergs, 2009-09-10 This edited book examines the East German foreign intelligence service Hauptverwaltung Aufklärung or HVA as a historical problem covering politics scientific technical and military intelligence and counterintelligence The contributors broaden the conventional view of East German foreign intelligence as driven by the inter German conflict to include its targeting of the United States northern European and Scandinavian countries highlighting areas that have previously received scant attention like scientific technical and military intelligence The CIA's underestimation of the HVA was a major intelligence failure As a result East German intelligence served as a stealth weapon against the US West German and NATO targets acquiring the lion's share of critical Warsaw Pact intelligence gathered during the Cold War This book explores how though all of the CIA's East German sources were double agents controlled by the Ministry of State Security the CIA was still able to declare victory in the Cold War Themes and topics that run through the volume include the espionage wars the HVA's relationship with the Russian KGB successes and failures of the BND West German Federal Intelligence Service in East Germany the CIA and the HVA the HVA in countries outside of West Germany disinformation and the role and importance of intelligence gathering in East Germany This book will be of much interest to students of East Germany Intelligence Studies Cold War History and German politics in general Kristie Macrakis is Professor at the Georgia Institute of Technology Atlanta Thomas Wegener Friis is an Assistant Professor at the University of Southern Denmark's Centre for Cold War Studies Helmut Müller-Enbergs is currently a Visiting Professor at the University of Southern Denmark and holds a tenured senior staff position at the German Federal Commission for the STASI Archives in Berlin *The Sword and the Shield* Christopher Andrew, 2000-08-29 *The Sword and the Shield* is based on one of the most extraordinary intelligence coups of recent times a secret archive of top level KGB documents smuggled out of the Soviet Union which the FBI has described after close examination as the most complete and extensive intelligence ever received from any source Its presence in the West represents a catastrophic hemorrhage of the KGB's secrets and reveals for the first time the full extent of its worldwide network Vasili Mitrokhin a secret dissident who worked in the KGB archive smuggled out copies of its most highly classified files every day for twelve years In 1992 a US ally succeeded in exfiltrating the KGB officer and his entire archive out of Moscow The archive covers the entire period from the Bolshevik Revolution to the 1980s and includes revelations concerning almost every country in the world But the KGB's main target of course was the United States Though there is top secret material on almost every country in the world the United States is at the top of the list As well as containing many fascinating revelations this is a major contribution to the secret history of the twentieth century Among the

topics and revelations explored are The KGB's covert operations in the United States and throughout the West some of which remain dangerous today KGB files on Oswald and the JFK assassination that Boris Yeltsin almost certainly has no intention of showing President Clinton The KGB's attempts to discredit civil rights leader in the 1960s including its infiltration of the inner circle of a key leader The KGB's use of radio intercept posts in New York and Washington D C in the 1970s to intercept high level U S government communications The KGB's attempts to steal technological secrets from major U S aerospace and technology corporations KGB covert operations against former President Ronald Reagan which began five years before he became president KGB spies who successfully posed as U S citizens under a series of ingenious disguises including several who attained access to the upper echelons of New York society Corrupted Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly **Battleground Berlin** David E. Murphy,Sergei A.
