

In "Fiscal harmonization in common markets" (2: 443) Shoup explains tax harmonization. It usually implies a group of tax adjustment programs somehow associated with various types of economic integration. This is so because the term tax harmonization has been developed, in response to the practical need for a general and comprehensive term which can cover a wide range of tax adjustment programs that are as yet not being identified definitely, though likely to be necessary to help in achieving a number of broad, and often competing, political and economic objectives of an economic integration. It has come to be understood that the term is often used in a special sense, with relevance only for the EEC.

EU Corporate Law and EU Company Tax Law Luca Cerioni, 2007-01-01 With the European Union striving to become the world's most competitive economy the developments in the two closely interconnected areas of European corporate law and European company tax law are of utmost importance This book focuses on the crucial issues raised by these developments on their far reaching implications and on the key

challenges to the future legislative choices The book illustrates the key developments in EU corporate law and EU company tax law the EU planned initiatives in these areas and at a time when member states increasingly tend to use company law and company tax provisions to attract businesses and investments it suggests how future developments can contribute to the undistorted functioning of the internal market and to the strategic Lisbon objective The explanation of these legislative and case law developments is of use to students and indicates new opportunities for business expansion strategies throughout the European Community The book concludes that new optional but attractive EU company law vehicles and company tax regimes would be in these two areas the only legal and effective means towards an undistorted functioning of the internal market and towards the Lisbon objective This ultimately gives rise to a far reaching challenge for all debates on the future patterns of European integration Luca Cerioni introduces new themes for academic research and discussion subjects for decision makers and at the same time uniquely makes these accessible to a much wider international public of students businesses and practitioners

Legal Aspects of Digital Preservation Thomas Hoeren, Barbara Kolany-Raiser, Silviya Yankova, Martin Hecheltjen, 2013-10-31 This important book illustrates the implications of preservation actions on intellectual property rights and data protection These can include Potential violation of data protection laws through the storage of personal data and potential infringement

Abuse of EU Law and Regulation of the Internal Market Alexandre Saydé, 2014-12-01 How can the concept of abuse of European Union law which can be defined as undesirable choice of law artificially made by a private citizen generate so much disagreement among equally intelligent individuals Seeking to transcend the classical debate between its supporters and adversaries the present study submits that the concept of abuse of EU law is located on three major fault lines of EU law which accounts for the well established controversies in the field The first fault line which is common to all legal orders opposes legal congruence the tendency to yield equitable legal outcomes to legal certainty the tendency to yield predictable legal outcomes Partisans of legal congruence tend to advocate the prohibition of abuses of law whereas partisans of legal certainty tend to oppose it The second fault line is specific to EU law and divides two conceptions of the regulation of the internal market If economic integration is conceived as the promotion of cross border competition among private businesses the paradigm of regulatory neutrality choices of law must be proscribed as abusive for they distort business competition But if economic integration is intended to promote competition among Member States the paradigm of regulatory competition choices of law by EU citizens represent a desirable process of arbitrage among national laws The third and final fault line corresponds to the tension between two orientations of the economic constitution of the European Union namely the fear of private power and the fear of public power Those who fear private power most tend to endorse the prohibition of abuses of law whereas those who fear public power most tend to reject it Seen in this way the concept of abuse of EU law offers a forum in which fundamental questions about the nature and function of EU law can be confronted and examined in a new light In May 2013 the thesis that this book was based on won

the First Edition of the European Law Faculties Association Award for Outstanding Doctoral Thesis **Corporate Tax Base in the Light of the IAS/IFRS and EU Directive 2013/34: A Comparative Approach** Mario Grandinetti, 2016-06-17 The recent relaunch of the European Commission's Common Consolidated Corporate Tax Base CCCTB project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits. In particular, the initiative hopes to remedy the severe barrier to cross border business caused by the 'Tower of Babel' by which companies' tax bases are determined under national law. This thorough analysis and commentary covers the influence of accounting rules on tax, considering both generally accepted standards, international accounting standards (IAS) and international financial reporting standards (IFRS) and EU Directive 2013/34. Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners, the United States and Brazil. Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU, this book covers every relevant detail, including the following and much more: criterion of evaluation of alternative fixed assets based on revaluated amounts; criterion based on fair value provisions applicable to income statements; notes, reports and financial statements; rules applicable to the publication of documents; transparency in payments to governments; dispositions on exemptions; hierarchy of general provisions and principles; balance sheet and profit and loss account simplifications for small and medium sized enterprises (SMEs); system of creditors' protection and protection of investors' interests. This book is a peerless explication of the taxation choices granted to Member States under IAS, IFRS and EU Directive 2013/34 and how they will be affected by ongoing Commission initiatives. Because relevant, timely, reliable and comparable information assumes a leading role in protecting the interests of investors, creditors and other stakeholders as well as in ensuring that all operators act on a level playing field under equal conditions, the analysis presented here is of immeasurable value to lawyers, business persons and officials concerned with taxation, not only in Europe but anywhere within the reach of international trade. **Canadian Tax Journal**, 1994 **EU Citizenship and Direct Taxation** Erik Ros, 2016-04-24 Freedom of movement is a key principle of the European Union (EU), resulting in the right of every EU citizen to move and reside freely within the EU. Many EU citizens work in other Member States than their Member State of origin. Direct taxes are not as such covered in the treaties and therefore have much smaller bases for harmonization at EU level than indirect taxes. As a result, decisions of the European Court of Justice (ECJ) on the clash between the EU principle of free movement and Member States' direct tax rules have a significant effect on national direct tax systems. This book focuses on the relation between free movement rights of EU citizens and the legal autonomy of Member States in the area of direct taxation and will immediately engage tax practitioners and scholars. The author asks and answers the question: Has the willingness at EU level to make EU citizenship a key driver behind the integration process come at the expense of national direct tax autonomy? The book's

incomparably thorough analysis of the distinctive evolution mainly via ECJ case law of the relation between the EU principle of free movement of persons and Member States direct tax rules includes in depth discussion of the following elements and more the concept of EU citizenship in the EU s constitutional and institutional development how the ECJ has interpreted the concept of free movement with regard to economically inactive persons how the notion of EU citizenship has widened the ECJ s view on treaty access how the ECJ has addressed the clash between free movement of persons and direct taxation in the EU s constitutional context and numerous tax policy initiatives with regard to EU citizens before and after the Treaty of Lisbon This is the first book to investigate in such detail how the ECJ has tried to reconcile specific national direct tax rules with the general EU principle of free movement of persons from the perspective of EU citizenship This book explains that the ECJ is in the process of reconceptualizing the market freedoms relating to the free movement of persons also in the area of direct taxation as part of a broader EU citizenship right for all economically active EU citizens to pursue an economic activity in a cross border context a right beyond the aim of realization of the internal market As an extremely important analysis of the influence of EU law on the direct tax autonomy of Member States this book is sure to be itself of great influence in the practice and study of taxation in the EU
