Taylorized Lives Narrative Productions In The Age Of Taylor Veblen And Ford:

Taylorized Lives Martha Banta, 1993 Scientific management Technology spawned it Frederick Winslow Taylor championed it Thorstein Veblen dissected it Henry Ford implemented it By the turn of the century practical visionaries prided themselves on having arrived at the one best way both to increase industrial productivity and to regulate the vagaries of human behavior Nothing escaped the efficiency craze and in this vivid wide ranging book Martha Banta explores its effect on the culture at large To the Taylorists everything needed tidying up government business warfare households and most of all the workplace with its unruly influx of strangers into the native scenes *Taylorized Lives* gives us a striking sense of what it was like to live work love and die when time motion and emotions were checked off on worksheets and management charts Canvassing the culture Banta shows how the cause of efficiency was taken up in narratives of every sort in mail order catalogs popular romances newspaper stories and personal testimonials from below as well as in the canonical works of writers from Henry Adams and William James to Sinclair Lewis Nathanael West and William Faulkner The strategies of impassioned theorists and hands on practitioners affected the kinds of narratives produced in the controversy over the pros and cons of the management culture they bear an eerie resemblance to the means by which we today storytellers all keep trying to make sense of our own chaotic times This interdisciplinary work charts the development of a managerial culture from its start in the steel mills of Pennsylvania through its spread across the American experience in an interlocking series of social systems and everyday practices Banta scrutinizes narrative strategies employed by inscribers as diverse as Josephine Goldmark Theodore Roosevelt Charlotte Perkins Gilman Anzia Yezierska Richard Harding Davis Booker T Washington and Theodore Dreiser by Taylor himself as well as Veblen and Ford by women who toiled on the factory floor by writers of dream copy for ready made houses and by Buster Keaton in his silent treatment of the dysfunctional honeymoon home With its historical scope and its provocative readings of assorted narratives this richly illustrated book offers a complex and disturbing picture of a period as well as invaluable insights into the way theory making continually makes and breaks cultures A remarkable work *Taylorized Lives* confirms Martha Banta's place as one of our leading cultural and literary critics *Life in the Shadows of the Crystal Palace, 1910-1927* Clarence Hooker, 1997 Hooker American thought and language Michigan State U examines the transformation of a sleepy village Highland Park Michigan into an industrial boomtown that later became an urban ghetto He describes how Ford's first large factory created the first American city dependent on the automobile industry and how the company tried to control the lives of workers and residents Annotation copyrighted by Book News Inc Portland OR *The Meaning of Technology. Selected Readings from American Sources* Montserrat Ginés Gibert, 2010-09 The significance of technology has been subject of continuous discussion This selection of readings ranging from primary sources to scholarly and critical works and literary renderings is intended to furnish elements for that discussion The history of the United States began with the advent of the industrial revolution which in turn became an integral part of American national and cultural

identity Accordingly that country provides an appropriate setting in which to examine the debate on technology The reader is asked to relate the selected views herein included to his or her own notion of technology and progress as they both relate to the also controversial terms of culture ideology nature and gender *Reader's Guide to the History of Science* Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Tinkering** Kathleen Franz,2011-06-07 In the first decades after mass production between 1913 and 1939 middle class Americans not only bought cars but also enthusiastically redesigned them By examining the ways Americans creatively adapted their automobiles Tinkering takes a fresh look at automotive design from the bottom up as a process that included manufacturers engineers advice experts and consumers in various guises Franz argues that automobile ownership opened new possibilities for ingenuity among consumers even as large corporations came to control innovation Franz weaves together a variety of sources from serial fiction to corporate documents to explore tinkering as a form of authority in a culture that valued ingenuity Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy Some canny drivers moved beyond modifying their individual cars to become independent inventors patenting and selling automotive accessories for the burgeoning national demand for aftermarket products Earl S Tupper was one such tinkerer who went on to invent Tupperware These savvy tinkerers worked in a changing landscape of invention shaped increasingly by automotive giants By the 1930s Ford and General Motors worked to change the popular discourse of ingenuity and used the world s fairs of the Depression as a stage to promote a hierarchy of innovation Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century

Introduction to Information Technology Chris Koch,2018-11-14 Science and technology have occupied almost all spheres of human life and living The wonderful achievements of science and technology have glorified the modern world and transformed the civilization into a scientific and technological civilization Considering the importance of science and technology they have been incorporated in every stage of education The present book deals with the teachers role possessing the vast knowledge of socialization social class influences the teaching ethics new technologies research perspective use of internet television management and professional accreditation in information technology etc The book has in its contents much to help and guide the students to choose any one of the professional alternatives to decide the direction of their careers This book thus provides many educational ideas for both teachers and students and is a must for all educational institutions and interested persons as well History of the Workplace Lars Bluma,Judith Rainhorn,2016-04-14 Interest in the history of

the workplace is on the rise Recent work in this area has combined traditional methods and theories of social history with new approaches and new questions It constitutes a topical contact zone a particularly dynamic field of research at the junction of social history history of occupational health and safety history of technology and the industrial environment This book focuses on the new approaches in this important and growing area and their possible range of influence These new attempts to rewrite a history of the workplace are multiple and in some cases disparate but share many key characteristics They are turning away from the assumption that class and class conflict is the prime mover in social history abandoning the traditional binomial workers vs entrepreneurs perspective which had long sustained the historical perspective on labour Moreover as this collections outlines these new attempts concentrate on the analysis of complex social networks of actors that defined and configured industrial workplaces suggesting a broadening of possible social actors This book was originally published as a special issue of the European Review of History

Modernism's Visible Hand Michael Osman, 2018-04-10 A groundbreaking history of the confluence of regulatory thinking and building design in the United States What is the origin of room temperature When did food become considered fresh or not fresh Why do we think management makes things more efficient The answers to these questions share a history with architecture and regulation at the turn of the twentieth century This pioneering technological and architectural history of environmental control systems during the Gilded Age begins with the premise that regulation of temperature the economy even the freshness of food can be found in the guts of buildings From cold storage and scientific laboratories to factories these infrastructures first organized life in a way we now call modern Drawing on a range of previously unexplored archival resources Michael Osman examines the increasing role of environmental technologies in building design from the late nineteenth century He shows how architects appropriated and subsumed the work of engineers as thermostats air handlers and refrigeration proliferated He argues that this change was closely connected to broader cultural and economic trends in management and the regulation of risk The transformation shaped the evolution of architectural modernism and the development of the building as a machine Rather than assume the preexisting natural order of things participants in regulation including architects scientists entrepreneurs engineers managers economists government employees and domestic reformers became entangled in managing the errors crises and risks stemming from the nation's unprecedented growth Modernism's Visible Hand not only broadens our conception of how industrial capitalism shaped the built environment but is also vital to understanding the role of design in dealing with ecological crises today

Texture Richard H. R. Harper, 2012-09-21 Why we complain about communication overload even as we seek new ways to communicate Our workdays are so filled with emails instant messaging and RSS feeds that we complain that there's not enough time to get our actual work done At home we are besieged by telephone calls on landlines and cell phones the beeps that signal text messages and work emails on our

BlackBerry's It's too much we cry or type as we update our Facebook pages compose a blog post or check to see what Shaquille O'Neal has to say on Twitter In *Texture* Richard Harper asks why we seek out new ways of communicating even as we complain about communication overload Harper describes the mistaken assumptions of developers that more is always better and argues that users prefer simpler technologies that allow them to create social bonds Communication is not just the exchange of information There is a texture to our communicative practices manifest in the different means we choose to communicate quick or slow permanent or ephemeral

Moral Energy in America Rebecca K. Wright, 2025-04-29 This book offers an illuminating exploration of how the concept of energy shaped American thought culture and politics throughout the first half of the twentieth century This essential history traces how politicians sociologists geographers urban planners economists and intellectuals adopted the idea of energy to bolster their social programs and visions of the future through distinctive energy imaginaries

Labor's Text Laura Hapke, 2001 Hapke's book remarkable in scope and inclusiveness offers those concerned with American working people a mine of information about and analysis of the rich lived history of American laborers as that has been represented in fictions of every kind She provides an invaluable foundation for understanding the dirtiest of America's dirty big secrets the pervasiveness of class differences class discrimination indeed of class conflict in this the wealthiest nation in history Hers is an indispensable guided tour through more than a century and a half of literary representations of hands at their looms pickets on the line agitators on their soapboxes ordinary working women men and children in kitchens parks factories and fields across America

Paul Lauter A K G M Smith Professor of Literature Trinity College *Labor's Text* sets over 150 years of the multi ethnic literature of work in the context of the history that informed it the history of labor organizing of industrial change of social transformations and of shifting political alignments Any scholar of American literature or American history cannot help but be enlightened by this boldly ambitious and illuminating book Shelly Fisher Fishkin professor of American studies University of Texas Austin *Labor's Text* traverses nearly two centuries of the U S literary response in fiction to workers and the work experience Casting her net more broadly than any of her predecessors Hapke's revision of the genre includes many recent writing not usually recognized as part of the tradition Coming at a moment when there is a steady increase in interest about class from color and gender inflected perspectives this is a work of committed scholarship that may well prove to be a crucial compass to reorient the thinking and scholarship of a new generation

Alan Wald author of *Writing from the Left* A stunning work of scholarship It is an extraordinary achievement and an immense contribution to working class studies Janet Zandy author of *Calling Home* *Working Class Women's Writings* Laura Hapke is a professor of English at Pace University The winner of two Choice magazine Outstanding Academic Book awards she is the author of *Daughters of the Great Depression* *Women Work and Fiction in the American 1930s* and other books on labor fiction and working class studies

American Literary Realism, Critical Theory, and Intellectual Prestige, 1880-1995 Phillip Barrish, 2001-02-19 Focusing on key works of late

nineteenth and early twentieth century American literary realism Phillip Barrish traces the emergence of new ways of gaining intellectual prestige that is new ways of gaining cultural recognition as unusually intelligent sensitive or even wise Through extended readings of works by Henry James William Dean Howells Abraham Cahan and Edith Wharton Barrish emphasises the differences between literary realist modes of intellectual and cultural authority and those associated with the rise of the social sciences In doing so he greatly refines our understanding of the complex relationship between realist writing and masculinity Barrish further argues that understanding the dynamics of intellectual status in realist literature provides new analytic purchase on intellectual prestige in recent critical theory Here he focuses on such figures as Lionel Trilling Paul de Man John Guillory and Judith Butler

On the Move Timothy Cresswell, 2012-11-12 *On the Move* presents a rich history of one of the key concepts of modern life mobility Increasing mobility has been a constant throughout the modern era evident in mass car ownership plane travel and the rise of the Internet Typically people have equated increasing mobility with increasing freedom However as Cresswell shows while mobility has certainly increased in modern times attempts to control and restrict mobility are just as characteristic of modernity Through a series of fascinating historical episodes Cresswell shows how mobility and its regulation have been central to the experience of modernity

Boarding Out David Faflik, 2012-09-30 Driven by intensive industrialization and urbanization the nineteenth century saw radical transformations in every facet of life in the United States Immigrants and rural Americans poured into the nation's cities often ahead of or without their families As city dwellers adapted to the new metropolis boarding out became for a few short decades the most popular form of urban domesticity in the United States While boarding's historical importance is indisputable its role in the period's literary production has been overlooked In *Boarding Out* David Faflik argues that the urban American boardinghouse exerted a decisive shaping power on the period's writers and writings Addressing the works of canonical authors such as Henry David Thoreau Nathaniel Hawthorne and Oliver Wendell Holmes as well as neglected popular writers of the era such as Fanny Fern and George Lippard Faflik demonstrates that boarding was at once psychically artistically and materially central in the making of our shared American culture

Truth in the Public Sphere Jason Hannan, 2016-10-20 Has truth become a casualty of America's increasingly caustic and volatile political culture *Truth in the Public Sphere* seeks to understand the significance of truth for the everyday world of human communication To this end this book explores the place of truth in several facets of the public sphere language ethics journalism politics media and art Featuring an international group of contributors from across the humanities and social sciences this collection is a definitive supplement to theoretical debates about the meaning and status of truth

Profound Science and Elegant Literature Stephanie P. Browner, 2013-03-26 In 1847 at the first meeting of the American Medical Association the newly elected president reminded

his brethren that the profession once venerated no longer earned homage spontaneously and universally The medical marketplace was crowded and competitive state laws regulating medical practice had been repealed and professional practitioners were often branded by their lay competitors as aristocrats bent on establishing a health care monopoly By 1900 the battles were over and as the president of AMA had hoped doctors were now widely venerated as men of profound science elegant literature polite accomplishments and virtue In fact by 1900 the doctor had replaced the minister as the most esteemed professional in the United States disease loomed larger than damnation and science promised to manage the discord differences and excesses that democracy seemed to license In *Profound Science and Elegant Literature* Stephanie Browner charts this trajectory and demonstrates at the same time that medicine's claims to somatic expertise and managerial talent did not go uncontested Even as elite physicians founded institutions that made professional medicine's authority visible and legitimate many others worried about the violence that might attend medicine's drive to mastery and science's equation of rational disinterest with white educated masculinity Reading fiction by a wide range of authors beside and against medical texts Browner looks to the ways in which writers such as Hawthorne Melville Holmes James Chesnut and Jewett inventoried the collateral damage that might be done as science installed its peculiar understanding of the body A work of impressive interdisciplinary reach *Profound Science and Elegant Literature* documents both the extraordinary rise of professional medicine in the United States and the aesthetic imperative to make the body meaningful that led many American writers to resist the medicalized body
