Teach Yourself Lotus 1-2-3 for Windows David Royall,Jacky Royall,1994-01-01 Teach Yourself Lotus 1 2 3 for Windows is an introductory guide for anyone learning how to use the spreadsheet for the first time It is ideal for people who know little or nothing about computers or spreadsheets **Subject Guide to Books in Print** ,2001 **PC/Computing** ,1996 **Film & Video Finder** ,1997 **History of Computing: Learning from the Past** Arthur Tatnall,2010-08-06 History of Computing Learning from the Past Why is the history of computing important Given that the computer as we now know it came into existence less than 70 years ago it might seem a little odd to some people that we are concerned with its history Isn t history about old things Computing of course goes back much further than 70 years with many earlier vices rightly being known as computers and their history is of course important It is only the history of electronic digital computers that is relatively recent History is often justified by use of a quote from George Santayana who famously said that Those who cannot remember the past are condemned to repeat it It is arguable whether there are particular mistakes in the history of computing that we should avoid in the future but there is some circularity in this question as the only way we will know the answer to this is to study our history This book contains papers on a wide range of topics relating to the history of c puting written both by historians and also by those who were involved in creating this history The papers are the result of an international conference on the History of Computing that was held as a part of the IFIP World Computer Congress in Brisbane in September 2010 **Internet Based Learning** Deanie French,1999 This book is for every teacher or trainer whose computer skills may be limited who wants to understand the Internet educationally and use it in his or her courses As institutional pressures mount to integrate the Internet into teaching this book provides a framework and a hands on introduction to what s involved whether it s adapting materials and teaching styles for the Web or designing a virtual course This book provides an introduction to the key educational concepts needed to adapt teaching methods and materials to the medium of the Internet an introduction to both basic and advanced Internet skills from using e mail to collaborative conferencing a framework for harnessing the Internet to achieve educational goals and successfully exploiting its resources features and applications to promote effective learning The framework starts from the premise that teachers should progressively apply Internet technology as their skills and confidence develop It develops the concept of augmented teaching styles supplementing traditional teaching with Internet based options demonstrates how to use modules as the building blocks for Web based learning and shows how to use the Internet to deliver individualized

learning by enhancing personal communication between teacher and student and addressing the diversity of learning styles
The book abounds with inspiring and thought provoking examples of Internet course materials developed by a wide variety of teachers and trainers including modules and forms created by the authors who have extensive experience in delivering Internet based courses A glossary of terms and directory of Internet sites and resources complete the book which is also supported by a related Web site **PC Mag** ,1993-08 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology *PC Magazine* ,1995
