Teachers Introduction To Composition In The Rhetorical Tradition:

A Teacher's Introduction to Composition in the Rhetorical Tradition W. Ross Winterowd, Jack Blum, 1994 This book traces the evolution of the growing and everchanging field of composition rhetoric through numerous schools of thought including Platonism Aristoteleanism New Criticism and the modern poststructuralism *The English Department* W. Ross Winterowd, 1998 To understand the history of English Ross Winterowd insists one must understand how literary studies composition rhetoric studies and influential textbooks interrelate Stressing the interrelationship among these three forces Winterowd presents a history of English studies in the university since the Enlightenment **Theorizing Composition** Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works **Emerson and the History of Rhetoric** Roger Thompson, 2017-11-08 Much has been written about Ralph Waldo Emerson's fundamental contributions to American literature and culture as an essayist philosopher lecturer and poet But despite wide agreement among literary and rhetorical scholars on the need for further study of Emerson as a rhetorical theorist little has been published on the subject This book fills that gap reenvisioning Emerson's work through his significant engagement with rhetorical theory in the course of his career and providing a more profound understanding of Emerson's influence on American ideology Moving beyond dominant literary critical thinking Thompson argues that for Emerson rhetoric was both imaginative and nonsystematic This book covers the influences of rhetoricians from a range of periods on Emerson's model of rhetoric Drawing on Emerson's manuscript notes journal entries and some of his rarely discussed essays and lectures as well as his more famous works the author bridges the divide between literary and rhetorical studies expanding our understanding of this iconic nineteenth

century man of letters Revision: History, Theory, and Practice ,2006 **Cicero and Modern Law** Richard O. Brooks,2017-07-05 Cicero and Modern Law contains the best modern writings on Cicero s major law related works such as the Republic On Law On Oratory along with a comprehensive bibliography of writings on Cicero s legal works These works are organized to reveal the influence of Cicero s writings upon the history of legal thought including St Thomas the Renaissance Montesquieu and the U S Founding Fathers Finally the articles include discussions of Cicero s influence upon central themes in modern legal thought including legal skepticism republicanism mixed government private property natural law conservatism and rhetoric The editor offers an extensive introduction placing these articles in the context of an overall view of Cicero s contribution to modern legal thinking *Resources in Education* ,1998 Reinventing Curriculum Linda Laidlaw,2005-05-06 The premise of this book is that written texts and literacy processes are developed within a complex weave of particular contexts or ecologies and the unique particularity of the learner s experiences histories memories and interpretations Laidlaw **The Formation of College English** Thomas P. Miller,1997 In the middle of the eighteenth century English literature composition and rhetoric were introduced almost simultaneously into colleges throughout the British cultural provinces Professorships of rhetoric and belles lettres were established just as print was reaching a growing reading public and efforts were being made to standardize educated taste and usage The provinces saw English studies as a means to upward social mobility through cultural assimilation In the educational centers of England however the introduction of English represented a literacy crisis brought on by provincial institutions that had failed to maintain classical texts and learned languages Today as rhetoric and composition have become reestablished in the humanities in American colleges English studies are being broadly transformed by cultural studies community literacies and political controversies Once again English departments that are primarily departments of literature see these basic writing courses as a sign of a literacy crisis that is undermining the classics of literature The Formation of College English reexamines the civic concerns of rhetoric and the politics that have shaped and continue to shape college English *I-writing* Karen Surman Paley,2001 In this ethnographic study of the teaching of writing Karen Surman Paley reveals the social significance of first person writing and the limitations of a popular taxonomy of composition studies Paley looks critically at the way social constructionists have created an Other in the field of composition studies and named it expressivist Paley demonstrates the complexity of approaches to teaching writing through an ethnographic study of two composition faculty at Boston College a program that some would say is expressivist She prompts her colleagues to consider how family experiences shape the way students feel about and treat people of races religions genders and sexual preferences other than their own Finally she suggests to the field of composition that practitioners spend less time shoring up taxonomies of the field and more time sharing pedagogies
