Learning by Teaching David Duran, Keith J. Topping, 2017 This book provides an essential overview of learning by teaching unpacking the underpinning theory research evidence and practical implications of peer learning in a variety of classroom contexts It aims to offer practical guidance for practitioners in structuring effective peer learning between professionals and between students alike It locates this phenomenon in current conceptions of learning and teaching far removed from traditional ideas of one way transmission of knowledge Exactly what happens to promote learning by teaching is explored Examples of learning by teaching are discussed and it is noted that this happens in school university and the workplace as well as through the Internet Learning by teaching within the student body is then explored and many different methods described The organizational features needed to improve learning by teaching consciously and deliberately are investigated These can be before teaching during teaching or after teaching Evidence based practical guidance is given Of course teachers can deploy learning by teaching for themselves but what if they also organize their students to teach each other thereby giving many more opportunities to discuss practise explain and question This takes pedagogical advantage of the differences between students turning classrooms into communities of learners where students learn both from their teacher and from their peers

Teaching for Deeper Learning Jay McTighe, Harvey F. Silver, 2020-01-22 Far too often our students attain only a superficial level of knowledge that fails to prepare them for deeper challenges in school and beyond In *Teaching for Deeper Learning* renowned educators and best selling authors Jay McTighe and Harvey F Silver propose a solution teaching students to make meaning for themselves Contending that the ability to earn understanding will equip students to thrive in school at work and in life the authors highlight seven higher order thinking skills that facilitate students acquisition of information for greater retention retrieval and transfer These skills which cut across content areas and grade levels and are deeply embedded in current academic standards separate high achievers from their low performing peers Drawing on their deep well of research and experience the authors Explore what kind of content is worth having students make meaning about Provide practical tools and strategies to help teachers target each of the seven thinking skills in the classroom Explain how teachers can incorporate the thinking skills and tools into lesson and unit design Show how teachers can build students capacity to use the strategies independently If our goal is to prepare students to meet
